## **Independent auditors' report on review of interim condensed consolidated financial statements**

To the Supervisory Council and Shareholders of VTB Bank:

### *Introduction*

We have reviewed the accompanying interim condensed consolidated financial statements of VTB Bank ("the Bank") and its subsidiaries (together "the Group") as at 30 June 2013, comprising of the interim consolidated statement of financial position as at 30 June 2013 and the related interim consolidated income statement and interim consolidated statement of comprehensive income for the three-month and six-month periods then ended, interim consolidated statements of cash flows and changes in shareholders' equity for the six-month period then ended and selected explanatory notes. Management is responsible for the preparation and presentation of these interim condensed consolidated financial statements in accordance with International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34"). Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

### *Scope of work*

We conducted our review in accordance with the International Standard on Review Engagements 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### *Conclusion*

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34.

**1. Principal Activities**

VTB Bank and its subsidiaries (the “Group”) comprise Russian and foreign commercial banks, and other companies and entities controlled by the Group.

VTB Bank, formerly known as Vneshtorgbank (the “Bank”, or “VTB”), was formed as Russia’s foreign trade bank under the laws of the Russian Federation on 17 October 1990. In 1998, following several reorganizations, VTB was reorganized into an open joint stock company. In October 2006 the Group started re-branding to change its name from Vneshtorgbank to VTB. In March 2007, the Bank for Foreign Trade was renamed into “VTB Bank” (Open Joint-Stock Company).

On 2 January 1991, VTB received a general banking license (number 1000) from the Central Bank of the Russian Federation (CBR). In addition, VTB holds licenses required for trading and holding securities and engaging in other securities-related activities, including acting as a broker, a dealer and a custodian, and providing asset management and special depository services. VTB and other Russian Group banks are regulated and supervised by the CBR and the Federal Financial Markets Service. Foreign Group banks operate under the bank regulatory regimes of their respective countries.

On 29 December 2004, the Bank became a member of the obligatory deposit insurance system provided by the State Corporation “Deposit Insurance Agency” (DIA). All Group subsidiary banks in Russia: “Bank VTB 24”, CJSC, “TransCreditBank”, JSC, “Bank of Moscow”, OJSC and “Leto Bank”, OJSC are also members of the obligatory deposit insurance system provided by DIA. The State deposit insurance scheme implies that DIA guarantees repayment of individual deposits up to the maximum total amount of guaranteed payment of RUR 700 thousand with a 100% compensation of deposited amount from 1 October 2008.

On 5 October 2005, VTB re-registered its legal address to 29 Bolshaya Morskaya Street, Saint-Petersburg 190000, Russian Federation. VTB’s Head Office is located in Moscow.

The Group operates in the corporate and investment banking, retail, real estate and other sectors. Corporate and investment banking include deposit taking and commercial lending in freely convertible currencies and in Russian Roubles, support of clients’ export/import transactions, foreign exchange, securities trading and trading in derivative financial instruments. The Group’s operations are conducted in both Russian and international markets. The Group conducts its banking business in Russia through VTB as a parent and 4 subsidiary banks with its network of 96 full service branches, including 23 branches of VTB, 8 branches of “Bank VTB 24”, CJSC, 40 branches of “TransCreditBank”, JSC, 25 branches of “Bank of Moscow”, OJSC located in major Russian regions.

The Group operates outside Russia through 15 bank subsidiaries, located in the Commonwealth of Independent States (“CIS”) (Armenia, Ukraine (2 banks), Belarus (2 banks), Kazakhstan and Azerbaijan), Europe (Austria, Cyprus, Germany, France, Great Britain and Serbia), Georgia, Africa (Angola); through 2 representative offices located in Italy and China; through 2 VTB branches in China and India and 2 branches of “VTB Capital”, Plc in Singapore and Dubai. The Group investment banking division also performs broker/dealer operations in the United States of America, securities dealing and financial advisory in Hong Kong and investment banking operations in Bulgaria.

VTB’s majority shareholder is the Russian Federation state, acting through the Federal Property Agency, which holds 60.9% of VTB’s issued and outstanding shares at 30 June 2013 (31 December 2012: 75.5%).

The number of employees of the Group at 30 June 2013 was 95,161 (31 December 2012: 80,860).

Unless otherwise noted herein, all amounts are expressed in billions of Russian Roubles rounded off to one decimal.

## 2. Operating Environment of the Group

**The Russian Federation.** The most part of the Group operations are conducted in the Russian Federation. Russia continues economic reforms and development of its legal, tax and regulatory frameworks as required by a market economy. Its economy is particularly sensitive to oil and gas prices.

The Russian economy is vulnerable to market downturns and economic slowdowns elsewhere in the world. In 2013 the Russian Government and the CBR continued to take measures to support the economy in order to overcome the consequences of the global financial crisis. Despite some indications of recovery there continues to be uncertainty regarding further economic growth, access to capital and cost of capital, which could negatively affect the Group's future financial position, results of operations and business prospects.

Also, factors including increased unemployment in Russia reduced corporate liquidity and profitability and increased corporate and personal insolvencies may affect the Group's borrowers' ability to repay the amounts due to the Group. In addition, changes in economic conditions may result in deterioration in the value of collateral held against loans and other obligations. To the extent that information is available, the Group has reflected revised estimates of expected future cash flows in its impairment assessment.

**Other jurisdictions.** In addition to Russia the Group conducts operations in CIS (Ukraine, Belarus, Kazakhstan, Azerbaijan and Armenia) and Georgia, European countries (Austria, Germany, France, Great Britain, Cyprus and Serbia) and some other countries. Tough economic and liquidity situation in many jurisdictions led to decrease or insignificant growth of GDP followed by shrinking in consumption as well as in investment activities. The primary targets of the local regulators were support of monetary stability, management of GDP deficit and inflation level regulation. In 2013 economy of the Republic Belarus remained hyperinflationary.

While management believes it is taking appropriate measures to support the sustainability of the Group's business in the current circumstances, unexpected further deterioration in the areas described above could negatively affect the Group's results and financial position in a manner not currently determinable.

## 3. Summary of Significant Accounting Policies

**Basis of preparation.** This condensed consolidated interim financial information has been prepared in accordance with IAS 34 *Interim Financial Reporting* and should be read in conjunction with the annual financial statements for the year ended 31 December 2012, which have been prepared in accordance with International Financial Reporting Standards (IFRS).

Except as described below, the same accounting policies and methods of computation were followed in the preparation of this consolidated condensed interim financial information as compared with the annual consolidated financial statements for the year ended 31 December 2012.

The preparation of financial statements requires management to make estimates and assumptions that affect reported amounts. These estimates are based on information available as of the date of the financial statements. Actual results can differ significantly from such estimates. Judgments and significant estimates in these financial statements are generally consistent with those applied in the preparation of the Group's annual financial statements for the year ended 31 December 2012. During the six-month period ended 30 June 2013, the Group modified certain aspects of the loan loss provision estimation process, primarily in respect of project development loans, assessment of seasonal factors for non-restructured consumer loans and the recovery assessment on non-performing consumer loans which resulted in the cumulative positive effect of RUR 6.2 billion on the provision for loan losses in the statement of income.

Income tax expense in respect of the current tax assets and liabilities is recognized based on the income tax rates enacted by the end of the reporting period in relevant tax jurisdictions where the Group is present. Income tax expense in respect of the deferred tax assets and liabilities is measured at the income tax rates that are expected to apply to the period when deferred assets are realized or liabilities are settled based on the income tax rates officially enacted by the end of the reporting period.

These interim condensed consolidated financial statements are presented in Russian Roubles (RUR), the national currency of the Russian Federation, where the Bank is domiciled. As at 30 June 2013, the principal closing rate of exchange used for translating balances in USD to Russian Roubles was USD 1 to RUR 32.7090 (at 31 December 2012: USD 1 to RUR 30.3727), and the principal closing rate of exchange used for translating balances in Euro was EUR 1 to RUR 42.7180 (at 31 December 2012: EUR 1 to RUR 40.2286).

#### **4. Adoption of New or Revised Standards and Interpretations**

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual financial statements for the year ended 31 December 2012, except for the adoption of new standards and interpretations as of 1 January 2013 noted below:

##### ***IFRS 10 Consolidated Financial Statements and IAS 27 Separate Financial Statements***

IFRS 10 establishes a single control model that applies to all entities including special purpose entities. IFRS 10 replaces the parts of previously existing IAS 27 *Consolidated and Separate Financial Statements* that dealt with consolidated financial statements and SIC-12 *Consolidation – Special Purpose Entities*. IFRS 10 changes the definition of control such that an investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. To meet the definition of control in IFRS 10, all three criteria must be met, including: (a) an investor has power over an investee; (b) the investor has exposure, or rights, to variable returns from its involvement with the investee; and (c) the investor has the ability to use its power over the investee to affect the amount of the investor's returns. IFRS 10 had no impact on the consolidation of investments held by the Group.

##### ***IFRS 11 Joint Arrangements***

IFRS 11 replaces IAS 31 *Interests in Joint Ventures* and SIC-13 *Jointly Controlled Entities – Non-Monetary Contributions by Ventures*. Changes in the definitions have reduced the number of types of joint arrangements to two: joint operations and joint ventures. The existing policy choice of proportionate consolidation for jointly controlled entities has been eliminated. Equity accounting is mandatory for participants in joint ventures. IFRS 11 had no impact on the interim condensed consolidated financial statements of the Group.

##### ***IFRS 12 Disclosure of Interests in Other Entities***

IFRS 12 replaces the disclosure requirements currently found in IAS 27 *Consolidated and Separate Financial Statements*, IAS 28 *Investments in Associates* and IAS 31 *Interests in Joint Ventures*. IFRS 12 requires disclosures in a number of areas, including significant judgments and assumptions made in determining whether an entity controls, jointly controls, or significantly influences its interests in other entities, extended disclosures on share of non-controlling interests in group activities and cash flows, summarized financial information of subsidiaries with material non-controlling interests, and detailed disclosures of interests in unconsolidated structured entities. IFRS 12 had no impact on the interim condensed consolidated financial statements of the Group.

##### ***IFRS 13 Fair Value Measurement***

IFRS 13 establishes a single source of guidance under IFRS for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under IFRS when fair value is required or permitted. The application of IFRS 13 has not materially impacted the fair value measurements carried out by the Group.

IFRS 13 also requires specific disclosures on fair values, some of which replace existing disclosure requirements in other standards, including IFRS 7 *Financial Instruments: Disclosures*. Some of these disclosures are specifically required for financial instruments by IAS 34.16A(j), thereby affecting the interim condensed consolidated financial statements. The Group provides these disclosures in Note 35.

##### ***IAS 28 Investments in Associates and Joint Ventures***

IAS 28 was revised in May 2011 to incorporate the equity method accounting for joint ventures in addition to associates. The revised IAS 28 had no impact on the interim condensed consolidated financial statements of the Group.

##### ***Amendments to IAS 19 Employee Benefits***

The IASB has published amendments to IAS 19 *Employee Benefits*, effective for annual periods beginning on or after 1 January 2013, which involve major changes to the accounting for employee benefits, including the removal of the option for deferred recognition of changes in pension plan assets and liabilities (known as the "corridor approach"). In addition, these amendments will limit the changes in the net pension asset (liability) recognised in profit or loss to net interest income (expense) and service costs. These amendments had no impact on the Group's financial position.

##### ***Amendments to IAS 1 Changes to the Presentation of Other Comprehensive Income***

The amendments to IAS 1 change the grouping of items presented in other comprehensive income. Items that could be reclassified (or recycled) to profit or loss at a future point in time (for example, net losses or gains on available-for-sale financial assets) would be presented separately from items that will never be reclassified (for example, revaluation of buildings). The amendment affects presentation only and has no impact on the Group's financial position or performance.

#### 4. Adoption of New or Revised Standards and Interpretations (continued)

##### **Amendments to IAS 1 Clarification of the requirement for comparative information**

The amendment to IAS 1 clarifies the difference between voluntary additional comparative information and the minimum required comparative information. An entity must include comparative information in the related notes to the financial statements when it voluntarily provides comparative information beyond the minimum required comparative period. The additional voluntarily comparative information does not need to be presented in a complete set of financial statements.

An opening statement of financial position (known as the 'third balance sheet') must be presented when an entity applies an accounting policy retrospectively, makes retrospective restatements, or reclassifies items in its financial statements, provided any of those changes has a material effect on the statement of financial position at the beginning of the preceding period. The amendment clarifies that a third balance sheet does not have to be accompanied by comparative information in the related notes. Under IAS 34, the minimum items required for interim condensed financial statements do not include a third balance sheet.

##### **Amendments to IFRS 7 Disclosures – Offsetting Financial assets and Financial Liabilities**

These amendments require an entity to disclose information about rights to set-off and related arrangements (e.g., collateral agreements). The disclosures would provide users with information that is useful in evaluating the effect of netting arrangements on an entity's financial position. The new disclosures are required for all recognized financial instruments that are set off in accordance with IAS 32 *Financial Instruments: Presentation*. The disclosures also apply to recognized financial instruments that are subject to an enforceable master netting arrangement or similar agreements, irrespective of whether they are set off in accordance with IAS 32. These amendments had no impact on the Group's financial position or performance.

**Amendment to IAS 32 Financial Instruments, Presentation:** This amendment clarifies that income taxes arising from distributions to equity holders are accounted for in accordance with IAS 12 *Income Taxes*. The amendment removes existing income tax requirements from IAS 32 and requires entities to apply the requirements in IAS 12 to any income tax arising from distributions to equity holders. The amendment did not have an impact on the interim condensed consolidated financial statements for the Group, as there is no tax consequences attached to cash or non-cash distribution.

**Amendment to IAS 34 Interim Financial Reporting:** The amendment clarifies the requirements in IAS 34 relating to segment information for total assets and liabilities for each reportable segment to enhance consistency with the requirements in IFRS 8 *Operating Segments*. Total assets and liabilities for a reportable segment need to be disclosed only when the amounts are regularly provided to the chief operating decision maker and there has been a material change in the total amount disclosed in the entity's previous annual consolidated financial statements for that reportable segment. The Group provides this disclosure as total segment assets and liabilities were reported to the chief operating decision maker.

#### 5. New Accounting Pronouncements

Since the Group published its last annual financial statements, certain new standards and interpretations have been issued that are mandatory for the Group's annual accounting periods beginning on or after 1 January 2014 or later and which the Group has not early adopted:

**IFRIC 21 – Levies (issued on 20 May 2013 and effective for annual periods beginning 1 January 2014).** The interpretation clarifies the accounting for an obligation to pay a levy that is not income tax. The obligating event that gives rise to a liability is the event identified by the legislation that triggers the obligation to pay the levy. The fact that an entity is economically compelled to continue operating in a future period, or prepares its financial statements under the going concern assumption, does not create an obligation. The same recognition principles apply in interim and annual financial statements. The application of the interpretation to liabilities arising from emissions trading schemes is optional. These IFRIC had no impact on the Group's financial position.

**Amendments to IAS 36 – Recoverable amount disclosures for non-financial assets (issued on 29 May 2013 and effective for annual periods beginning 1 January 2014; earlier application is permitted if IFRS 13 is applied for the same accounting and comparative period).** The amendments remove the requirement to disclose the recoverable amount when a CGU contains goodwill or indefinite lived intangible assets but there has been no impairment.

**Amendments to IAS 39 – Novation of Derivatives and Continuation of Hedge Accounting (issued on 27 June 2013 and effective for annual periods beginning 1 January 2014).** The amendments will allow hedge accounting to continue in a situation where a derivative, which has been designated as a hedging instrument, is novated (i.e. parties have agreed to replace their original counterparty with a new one) to effect clearing with a central counterparty as a result of laws or regulation, if specific conditions are met. The Group is currently assessing the impact of the amendments on the disclosures in its financial statements.

## 6. Changes in Presentation and Reclassifications

**Debt securities issued reclassification**

As at 30 June 2013, the Group determined that certain of its promissory notes issued, previously included in debt securities issued, represent in-substance deposit relationships. These promissory notes are acquired through the Central Treasury by the Group's customers, large corporations, as a substitute to customer deposits and are expected by the Group to be held to maturity by these customers. Accordingly, the Group concluded these promissory notes should be reclassified as customer deposits. The reclassification and its impact on comparative period information as at 31 December 2012 in the interim consolidated statement of financial position and corresponding notes are as follows:

<b>(unaudited)</b>	<b>As previously reported</b>	<b>Reclassification</b>	<b>As reclassified</b>
Customer deposits	3,672.8	140.6	3,813.4

In accordance with Russian legislation, loans may only be written off with the approval of the authorized management body and, in certain cases, with the respective decision of the Court.

**30. Dividends and Amounts Paid and Due under Perpetual Loan Participation Notes**

In June 2013, Annual General Meeting of VTB shareholders declared dividends of RUR 15.0 billion for 2012 (RUR 0.00143 per share) which were paid in July-August 2013 including RUR 0.1 billion to several Group's subsidiaries.

In June 2012, Annual General Meeting of JSC VTB Bank shareholders declared dividends of RUR 9.2 billion for 2011 (RUR 0.00088 per share), which were paid in July-August 2012 including RUR 0.1 billion to several Group's subsidiaries.

In June 2013, VTB paid USD 106.9 million (RUR 3.4 billion) due under Perpetual Loan Participation Notes. The amounts due of USD 106.9 million (RUR 3.5) under Perpetual Loan Participation Notes payable in the next six months period became mandatory after declaration of dividends by Annual General Meeting of VTB shareholders.

**31. Basic and Diluted Earnings per Share**

Basic earnings per share are calculated by dividing the net profit or loss attributable to ordinary shareholders of the parent by the weighted average number of ordinary shares in issue during the period, excluding the average number of ordinary shares purchased by the Group and held as treasury shares.

The Group has no dilutive potential ordinary shares; therefore, the diluted earnings per share are equal to basic earnings per share.

## 32. Income Tax

The Group's effective income tax rate for the first six months of 2013 was 25.5% (the first six months of 2012: 23%) which is close to the theoretical tax rate. The effective income tax rate for the first six months of 2013 differs from the theoretical tax rate due to difference associated with non-deductible expenses and income taxed at different rates.

The following tables provide disclosure of income tax effects relating to each component of other comprehensive income for the six months and the three months ended 30 June 2013 and 2012:

## 33. Contingencies and Commitments

**Legal proceedings.** From time to time and in the normal course of business, claims against the Group are received. As at the reporting date the Group had several unresolved legal claims. Management is of the opinion that there would be no material outflow of resources and accordingly no material provision has been made in these Interim condensed consolidated financial statements.

**Credit related commitments.** The total outstanding contractual amount of irrevocable undrawn credit lines, letters of credit and guarantees does not necessarily represent future cash requirements, as these financial instruments may expire or terminate without being funded. Outstanding credit related commitments are as follows:

	<b>30 June 2013 (unaudited)</b>	<b>31 December 2012</b>
Guarantees issued	674.9	621.8
Letters of credit	44.0	38.8

Less: provision for impairment on credit related commitments (Note 29)	(0.6)	(0.9)
<b>Total credit related commitments</b>	<b>762.7</b>	<b>707.8</b>

**33. Contingencies and Commitments (continued)**

The Bank received export letters of credit for further advising to its customers. The total amount of received letters of credit as at 30 June 2013 was RUR 111.0 billion (31 December 2012: RUR 128.1 billion). Commitments under import letters of credit and guarantees are collateralized by customer deposits of RUR 14.2 billion (31 December 2012: RUR 11.2 billion).

As at 30 June 2013, included in guarantees issued are guarantees issued for two Russian companies of RUR 48.0 billion or 7% of guarantees issued. As at 31 December 2012, included in guarantees issued are guarantees issued for a Russian company of RUR 50.9 billion or 8% of the guarantees issued.

**Purchase commitments.** As at 30 June 2013, the Group had RUR 28.4 billion of outstanding commitments for the purchase of precious metals (31 December 2012: RUR 35.6 billion). As the price of these contracts is linked to the fair value of precious metals at the date of delivery, no gain or loss is recognized on these contracts.

**34. Analysis by Segment**

In accordance with IFRS 8, *Operating Segments*, the Group defined as the major operating segments the global business lines. Majority of the Group's entities' activities and resources are allocated and managed and their performance is assessed based on the respective global business line segment information. These operating segments represented by the global business lines are accompanied by entity based segments of those Group's entities that have not yet been integrated into the global business lines as of the reporting date. On this basis, the Group aggregated these operating segments in accordance with IFRS 8 into the following reportable segments: Corporate-Investment banking (CIB) (Investment banking, Loans and Deposits, Transaction banking subsegments), Retail banking, Treasury and Other.

This segment disclosure is presented on the basis of IFRS compliant data of the global business lines and entities adjusted, where necessary, for intersegment reallocation. Qualitative and quantitative information about operating segments is reported to the appropriate operating decision makers for the purposes of making operating decisions on allocation of resources to the segment and assessment of its performance.

The change in reportable segment composition is mainly caused by the change in the system of the Group management and the integration of activities of certain entities into the global business lines. As at 31 December 2012 the Group introduced a new reportable segment Treasury as a result of further development of the global treasury function, which lends and borrows funds on money market, undertakes the Group's funding through issue of debt securities and attraction of syndicated facilities. In addition, the segment manages the liquidity position through transactions with marketable securities. This segment is also responsible for accumulation and further redistribution of all funds attracted by other segments.

Revenues disclosed in the note include the following: interest income, fee and commission income, other operating income, revenue from non-banking activities, net insurance premium earned, gains less losses from financial assets available-for-sale, gains less losses arising from financial assets at fair value through profit or loss, gains less losses from dealing in foreign currencies together with foreign exchange translation gains less losses, gains less losses arising from extinguishment of liability, recovery of losses on initial recognition of financial instruments and loans restructuring and other gains/(losses) on loans and advances to customers and share in income of associates. Each element is included in calculation of revenues by each subsegment/segment without subsegments in case it is positive for this subsegment/segment without subsegments. The totals are calculated as sum of the line components.

Intersegment transactions were executed predominantly in the normal course of business.

## 35. Fair Values of Financial Instruments

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- ▶ Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- ▶ Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- ▶ Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The following table shows an analysis of financial instruments recorded at recurring fair value by level of the fair value hierarchy as at 30 June 2013 (unaudited):

	Level 1	Level 2	Level 3	Total
<b>Financial assets</b>				
<i>Non-derivative financial assets at fair value through profit or loss</i>				
Financial assets held for trading	297.7	54.5	1.9	354.1
Financial assets designated as at fair value through profit or loss	1.5	–	10.0	11.5
<i>Trading Derivative financial instruments</i>	0.1	107.9	4.9	112.9
<i>Hedging Derivative financial instruments</i>	–	0.4	–	0.4

**35. Fair Values of Financial Instruments (continued)**

For financial instruments that are recognised at fair value on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Financial assets at fair value through profit or loss are mainly dependent on the change of input variables used to determine fair value, such as interest rates and foreign exchange rates. A significant portion of the available-for-sale financial assets in Level 3 is invested in shares of a non-listed companies which are valued based on non-market observable information. Changes in assumptions can lead to adjustments in the fair value of the investment.

**Movement in Level 3 financial instruments measured at fair value**

A reconciliation of movements in Level 3 of the fair value hierarchy by class of instruments for the period ended 30 June 2013 (unaudited) is as follows:

**Transfers between levels**

During the period ended 30 June 2013, the financial assets held for trading in the amount of RUR 37.6 billion and financial assets available-for-sale in the amount of RUR 25.6 billion were transferred from Level 1 to Level 2 as they became estimated on the market internal model basis. Previously their fair values were determined using market quotes.

During the period ended 30 June 2013, the financial assets held for trading were transferred from Level 2 to Level 1 in the amount of RUR 1.4 billion as their fair values became determined using market quotes. Previously their fair values were estimated on the market internal model basis.

During the period ended 30 June 2013, the Group transferred financial assets available-for-sale from Level 3 to Level 1 of the fair value hierarchy in the carrying amount of RUR 7.6 billion. The reason for the transfer from Level 3 to Level 1 is the change in the basis of valuation of the fair value due to the appearance of the active market for these instruments.

During the period ended 30 June 2013, the Group transferred financial assets available-for-sale from Level 3 to Level 2 of the fair value hierarchy in the carrying amount of RUR 0.2 billion due to the change in the basis of valuation of the fair value from the valuation models with significant non market-observable inputs as at 31 December 2012 to the recent market transaction as at 30 June 2013.

During the period ended 30 June 2013, the Group transferred financial assets held for trading from Level 3 to Level 2 of the fair value hierarchy in the carrying amount of RUR 2.1 billion due to the change in the basis of valuation of the fair value from the valuation models with significant non market-observable inputs to the market internal model basis. There have been no transfers from Level 1 to Level 3 during the period ended 30 June 2013.

## 35. Fair Values of Financial Instruments (continued)

Impact on fair value of Level 3 financial instruments of changes to key assumptions

The following table shows the quantitative information as at 30 June 2013 about significant unobservable inputs used in the fair value measurement categorized within Level 3 of the fair value hierarchy:

## 35. Fair Values of Financial Instruments (continued)

The following table shows the quantitative information about sensitivity of the fair value measurement categorized within Level 3 of the fair value hierarchy to changes in significant unobservable inputs:

	30 June 2012 (unaudited)	
	Carrying amount	Effect of reasonably possible alternative assumptions
Investment securities – available-for-sale	26.6	24.2-33.5
Financial assets designated as at fair value through profit or loss	10.0	9.8-10.2
Financial instruments at fair value through profit or loss including derivatives	6.7	6.6-7.0
Investments in associates and joint ventures	1.4	1.0-1.9

*Methods and assumptions for Level 2 financial instruments.*

The fair value of financial assets at fair value through profit or loss, available for sale and derivative financial instruments valued according to Level 2 models was estimated based on DCF (projected cash flows) method using the assumption of future coupon payment and recent transactions prices. The fair value of structured financial assets was estimated based on stochastic modelling (Level 2 model). Probability models were calibrated using market indicators (currency forward, ITRAX Index). Value at Risk was calculated based on full historical recalculation and Monte-Carlo simulation.

*Fair value of financial assets and liabilities not carried at fair value*

Set out below is a comparison by class of the carrying amounts and fair values of the Group's financial instruments that are not carried at fair value in the consolidated statement of financial position. The table does not include the fair values of non-financial assets and non-financial liabilities.

	30 June 2013 (unaudited)		31 December 2012

Subordinated debt	291.9	280.5	285.8	276.4
Other financial liabilities	62.6	62.6	135.9	135.9

The following describes the methodologies and assumptions used to determine fair values for those financial instruments which are not already recorded at fair value in the financial statements.

*Assets for which fair value approximates carrying value.* For financial assets and financial liabilities that are liquid or having a short term maturity it is assumed that the carrying amounts approximate to their fair value. This assumption is also applied to customer current/settlement deposits without a specific maturity.

*Fixed and variable rate financial instruments.* For quoted debt instruments the fair values are determined based on quoted market prices. The fair values of unquoted debt instruments are estimated by discounting future cash flows using rates currently available for debt on similar terms, credit risk and remaining maturities.

**36. Related Party Transactions**

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions as defined by IAS 24 *Related Party Disclosures*. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

Transactions and balances with related parties comprise transactions and balances with Russian government-related entities (both directly and indirectly) and associates and joint ventures and are stated in the tables below:

For the six month-period ended 30 June 2013, the total remuneration of the directors and key management personnel of the Group including pension contributions amounted to RUR 4.3 billion (30 June 2012: RUR 3.5 billion). Key management personnel include VTB Supervisory Council, VTB Management Board, VTB Statutory Audit Committee and key management of subsidiaries. Loans to the key management personnel as at 30 June 2013 amounted to RUR 1.3 billion (31 December 2012: RUR 1.0 billion). Compensation to key management personnel primarily consists of short term employee benefits.

**37. Capital Management and Capital Adequacy**

The Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of its business.

The CBR requires banks to maintain a minimum capital adequacy ratio of 10.0% of risk-weighted assets, computed based on Russian accounting legislation. As at 30 June 2013 and 31 December 2012 the Bank's capital adequacy ratio on this basis exceeded the statutory minimum.

The Group's international risk based capital adequacy ratio, computed in accordance with the Basel Accord guidelines issued in 1988, with subsequent amendments including the amendment to incorporate market risks. These ratios exceeded the minimum ratio of 8.0% recommended by the Basel Accord as disclosed below:

	<b>30 June 2013</b> <i>(unaudited)</i>	<b>31 December</b> <b>2012</b>

**38. Business Combinations**

In the second quarter of 2013 the Group obtained control of the following companies as a result of debt settlement:

In April 2013, the Group received the authority of the sole executive body of "Print House "Pushkinskay ploshad", OJSC, thus receiving control without increasing its 3.85% share.

In May 2013, the Group acquired 100% of the shares of the closed mutual fund "Globus" for RUR 1.3 billion, thus obtaining control over "Golovino Plaza", LLC, "NPO Informatika", LLC, "Trast-Reserve", CJSC, "IPO Poligran", CJSC.

In May 2013, the Group obtained 79.0% controlling share in the closed mutual fund "Hotels and Resorts" by purchasing additional 59.1% for RUR 0.5 billion, which resulted in control over "Hotel Sokolniki", CJSC and "Management company "Hotel Management", CJSC.

**38. Business Combinations (continued)**

The fair values of identifiable assets and liabilities of these companies at the acquisition date were as follows:

	<i>“Print House “Pushkinskay Ploshad”, OJSC</i>	<i>Closed mutual fund “Globus”</i>	<i>Closed mutual fund “Hotels and Resorts”</i>
<b>Assets</b>			
Cash and short-term funds	–	–	0.1

Derecognition of previously granted loans/ held trade receivables to the acquiree	1.4	4.9	2.0
Fair value of the acquirer’s previously held interest in the acquiree	0.1	–	0.5
Non-controlling interests (proportionate share of the acquiree’s identifiable net assets)	1.3	0.1	0.3
Less: fair value of identifiable net assets of subsidiary	(2.8)	(7.4)	(3.5)
<b>Excess of fair value of acquired net asset over cost</b>	<b>–</b>	<b>(1.1)</b>	<b>(0.2)</b>

If the acquisition of closed mutual funds “Globus” and “Hotels and Resorts” had taken place at the beginning of the year, the net profit and operating income of the Group would not have been materially different. If “Print House “Pushkinskay Ploshad”, OJSC had been acquired at the beginning of the year, gross income from non-banking activities would have increased by RUR 1.7 billion.

The amounts of revenues and net profit of the acquirees since the acquisition date have no material effect on the interim consolidated income statement of the Group.

**39. Subsequent Events**

In August 2013, “TransCreditBank”, CJSC redeemed Series 5 local bonds in the total amount of RUR 3.0 billion upon maturity.

In August 2013, VTB redeemed Series 9 eurobonds in the amount of CHF 400 million (RUR 14.1 billion) upon maturity.

In August 2013, “VTB 24”, CJSC has partially redeemed at put option Series 4 local bonds in the amount of RUR 6.3 billion.

In September 2013, “Bank of Moscow”, OJSC redeemed Series 8 eurobonds in the amount of CHF 350 million (RUR 12.4 billion) upon maturity.

In September 2013, VTB has partially redeemed at put option Series BO-08 local bonds in the amount of RUR 7.4 billion.

In September 2013 the Group increased its share in “Segezha Pulp and Paper Mill”, OJSC up to 100% by purchasing 50% minus one share from the other shareholder for RUR 0.5 billion under mandatory offer.
