Leonid Melamed, President and Chief Executive Officer of Sistema, commented: "We are pleased with the results for the second quarter of 2010 as group revenues and OIBDA displayed double digit growth versus our strong performance in the first quarter. Solid results were posted across our entire portfolio: healthy improvement to profitability in our Telecoms business unit, continued significant growth in the Oil and Energy business unit, strengthening of margins in the Consumer business unit and sales and profitability in our High Technology business that now exceeds pre-crisis levels. This strong operating performance has provided excellent cash yield, net cash provided by operations more than tripling quarter on quarter, allowing us to deleverage at the holding company level. We will maintain our focus on optimizing our portfolio in the second half of the year, while remaining alert to opportunistic new investments. Sistema continues to adhere to its stated goal of "5*5>25" through our investment strategy "2i plus." This means investment emphasis on infrastructure providing value-added services to meet the basic needs of the Russian population, and investment in internet and communications, plus partnerships with the state where we view that as advantageous."

GROUP OPERATING REVIEW

Sistema's consolidated revenues increased by 63.1% year-on-year and by 11.5% quarter-onquarter, partially as a result of the significant growth in the contribution from the Oil and Energy business unit. Non-telecommunications businesses, including the Oil and Energy business unit, accounted for 59.1% of the total Group consolidated revenues in the second quarter, compared to 43.8% and 57.5% in the second quarter of 2009 and the first quarter of 2010, respectively.

Selling, general and administrative expenses increased by 13.2% year-on-year and by 1.6% quarter-on-quarter to US\$ 867.1 million following the changes in consolidated revenues.

The Group's OIBDA was up 56.4% year-on-year and 14.3% quarter-on-quarter. The quarter-onquarter growth was due to improvement of the profitability of BashTek (contributed US\$119.0 mln. to consolidated OIBDA growth, or approximately 50.9% of OIBDA growth) and Telecommunications (contributed US\$94.6 mln., or approximately 40.5% of consolidated OIBDA growth). The Group's OIBDA margin was 27.0% in the reporting quarter, compared to 28.2% in the second quarter of 2009 and 26.4% in the first quarter of 2010.

Depreciation, depleting and amortization expense increased by 35.7% year-on-year and by 4.2% quarter-on-quarter to US\$ 734.3 million due to the completion of acquisition accounting for Bashkir companies with corresponding rise in value of property, plant and equipment.

The Group's operating income nearly doubled year-on-year and increased by 21.9% quarter-onquarter. Operating margin was 16.4% in the reporting quarter compared to 15.4% in the second quarter of 2009 and 15.0% the first quarter of 2010.

¹ Here and further, comparative financial results for the second quarter of 2009 are presented as reported historically except for MTS results which are presented including consolidated results of Comstar and TS Retail. The difference between comparative financial results for the second quarter of 2009, as presented in the Financial Summary and Operating Review, and corresponding income statement figures on page 17, is due to the allocation of the results of Bashkir Oil & Energy business acquisition accounting, including \$2,783 million gain on acquisition, initially recognized in the third and fourth quarters of 2009, to the second quarter of 2009, as required by authoritative guidance on business combination.

² See Attachment A for definitions and reconciliation of OIBDA to GAAP financial measures.

The Group's interest expense was US\$ 397.6 million in the second quarter of 2010, compared to US\$ 260.8 million in the second quarter of 2009 and US\$ 430.9 million in the first quarter of 2010, following changes in both the amount of total outstanding debt and average interest rates.

The consolidated net income attributable to Sistema was US\$ 144.0 million in the second quarter of 2010, compared to net income of US\$ 246.2 million in the corresponding period of 2009 and net income of US\$ 144.8 million in the first quarter of 2010. The decrease in net income is mostly due to the foreign exchange loss in the second quarter of 2010 compared to foreign exchange gains recognized in the second quarter of 2009 and in the first quarter of 2010.

The unit's revenues increased by 18.5% year-on-year and by 7.2% quarter-on-quarter due to positive seasonality effects at MTS. The Telecommunications business unit accounted for 40.9% of the Group's consolidated revenues in the reporting quarter, compared to 56.2% and 42.5% in the second quarter of 2009 and the first quarter of 2010, respectively.

MTS' total subscriber base exceeded 103 million customers as of June 30, 2010. ⁴ As a result of Comstar-UTS acquisition by MTS from Sistema, the majority owner of both MTS and Comstar-UTS, the acquisition was accounted for as a transaction between entities under common control. Similar to a pooling of interests, whereby the assets and liabilities of Comstar-UTS were recorded at carrying value on Sistema's balance sheet, MTS' historical financial information was recast to include the acquired entity for all periods presented.

The total fixed line subscriber base decreased to 111,000 users from 134,000 subscribers in the first quarter of 2010 as a result of continued migration to the mobile network.

SSTL launched its services in Andhra Pradesh, the twelfth telecom circle which SSTL has entered. The company announced the launch of its Level 3 Green Data Centre in Chennai. With its presence in Andhra Pradesh, SSTL completed the roll out of its services in all of the four South Indian states. Operating Income Before Depreciation and Amortization (OIBDA) and OIBDA margin. OIBDA represents operating income before depreciation and amortization. OIBDA margin is defined as OIBDA as a percentage of our net revenues. Our OIBDA may not be similar to OIBDA measures of other companies; is not a measurement under accounting principles generally accepted in the United States and should be considered in addition to, but not as a substitute for, the information contained in our consolidated statement of operations. We believe that OIBDA provides useful information to investors because it is an indicator of the strength and performance of our ongoing business operations, including our ability to fund discretionary spending such as capital expenditures, acquisitions of businesses and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under generally accepted accounting principles, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Our OIBDA calculation is commonly used as one of the bases for investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies. OIBDA can be reconciled to our consolidated statements of operations as follows:
