MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following management's discussion in conjunction with our unaudited consolidated interim condensed financial information as of and for the six months ended June 30, 2008. The consolidated interim condensed financial information has been prepared in accordance with International Accounting Standard 34 "Interim financial reporting" ("IAS 34"). This financial information should be read together with the consolidated financial statements for the year ended December 31, 2007 prepared in accordance with International Financial Reporting Standards ("IFRS").

OVERVIEW

We are one of the world's largest oil and gas companies in terms of reserves, production and market capitalization. Our revenues are primarily derived from sales of natural gas, crude oil and other hydrocarbon products to Western and Central Europe, Russia and other former Soviet Union countries.

We divide our operations into the following five main business segments:

- Production of gas exploration and production of gas;
- Transport transportation of gas;
- Distribution domestic and export sales of gas;
- Production of crude oil and gas condensate exploration of oil and gas condensate, sales of crude oil and gas condensate;
- Refining processing of oil, gas condensate and other hydrocarbons, and sales of refined products.

Other businesses primarily comprise electric and heat energy generation and banking.

Our five main business segments are mutually dependent, with a significant portion of the revenues of one segment comprising a part of the costs of another segment. In particular, our Distribution segment purchases natural gas from our Production of gas segment and transportation services from our Transport segment. Our Refining segment purchases crude oil and gas condensate from the Production of crude oil and gas condensate segment. We establish internal transfer prices with reference to the specific funding requirements of the individual subsidiaries within each segment. Accordingly, the results of operations of these segments on a stand-alone basis do not necessarily represent each segment's underlying financial position and results of operations as if it was a stand-alone business. For this reason, we do not analyze any of our main segments separately in the discussion that follows.

RECENT VOLATILITY IN GLOBAL AND RUSSIAN FINANCIAL MARKETS

The ongoing global liquidity crisis which commenced in the middle of 2007 has resulted in, among other things, a lower level of capital market funding, lower liquidity levels across the banking sector, and, at times, higher interbank lending rates. The uncertainties in the global financial market, have also led to bank failures and bank rescues in the United States of America, Western Europe and in Russia. Such circumstances could affect the ability of the Group to obtain new borrowings and re-finance its existing borrowings at terms and conditions similar to those applied to earlier transactions. The borrowers of the Group may also be affected by the lower liquidity situation which could in turn impact their ability to repay their outstanding loans. Deteriorating operating conditions for borrowers may also have an impact on management's cash flow forecasts and assessment of the impairment of financial and non-financial assets. To the extent that information is available, management has reflected revised estimates of expected future cash flows in their impairment assessments.

The uncertainty in the global markets combined with other local factors has during 2008 led to very high volatility in the Russian Stock Markets and at times much higher than normal interbank lending rates.

Management is unable to estimate reliably the effects on the Group's financial position of any further deterioration in the liquidity of the financial markets and the increased volatility in the currency and equity markets. Management believes it is taking all the necessary measures to support the sustainability and growth of the Group's business in the current circumstances.
