### Independent Auditor's Report

To the Shareholders and Board of Directors of Public Joint Stock Company Federal Hydro-Generating Company – RusHydro (PJSC RusHydro)

We have audited the accompanying consolidated financial statements of PJSC RusHydro and its subsidiaries (the "Group"), which comprise the consolidated statement of financial position as at 31 December 2015 and the consolidated statements of income, comprehensive income, changes in equity and cash flows for 2015, and notes comprising a summary of significant accounting policies and other explanatory information.

#### Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on the fair presentation of these consolidated financial statements based on our audit. We conducted our audit in accordance with Russian Federal Auditing Standards and International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to express an opinion on the fair presentation of these consolidated financial statements.

#### Independent Auditor's Report (Continued)

#### Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Group as at 31 December 2015, and its financial performance and its cash flows for 2015 in accordance with International Financial Reporting Standards.

#### Note 1. The Group and its operations

These Consolidated Financial Statements have been prepared in accordance with International Financial Reporting Standards for the year ended 31 December 2015 for PJSC RusHydro (hereinafter referred to as "the Company") and its subsidiaries (hereinafter referred to as the "Group").

The Company was incorporated and is domiciled in the Russian Federation. The Company is a joint stock company limited by shares and was set up in accordance with Russian regulations.

The Group's primary activities are generation and sale of electricity and capacity on the Russian wholesale and retail markets, as well as generation and sale of heat energy.

**Economic environment in the Russian Federation.** The Russian Federation displays certain characteristics of an emerging market. Its economy is particularly sensitive to oil and gas prices. The legal, tax and regulatory frameworks continue to develop and are subject to frequent changes and varying interpretations (Note 28). During 2015 the Russian economy was negatively impacted by low oil prices, ongoing political tension in the region and continuing international sanctions against certain Russian companies and individuals, all of which contributed to the country's economic recession characterised by a decline in gross domestic product. The financial markets continue to be volatile and are characterised by frequent significant price movements and increased trading spreads. Russia's credit rating was downgraded to below investment grade.

This operating environment has a significant impact on the Group's operations and financial position. Management is taking necessary measures to ensure sustainability of the Group's operations. However, the future effects of the current economic situation are difficult to predict and management's current expectations and estimates could differ from actual results.

*Relations with the Government and current regulation.* As at 31 December 2015 the Russian Federation owned 66.84 percent of the total voting ordinary shares of the Company (31 December 2014: 66.84 percent).

The Group's major customer base includes a large number of entities controlled by, or related to the Government. Furthermore, the Government controls contractors and suppliers, which provide the Group with electricity dispatch, transmission and distribution services, and a number of the Group's fuel and other suppliers (Note 6).

In addition, the Government affects the Group's operations through:

- participation of its representatives in the Company's Board of Directors;
- regulation of tariffs for electricity, capacity and heating;
- approval and monitoring of the Group's investment programme, including volume and sources of financing.

Economic, social and other policies of the Russian Government could have a material effect on operations of the Group.

**Overview of the electricity and capacity market.** Capacity and electricity, while interrelated, are treated as separate economic products. The capacity market represents the obligation and ability to keep sufficient generation capability in reserve in order to satisfy a target level of potential demand, while the sale of electricity represents the actual delivery of electricity to the purchaser.

The Russian electricity and capacity market consists of wholesale and retail markets.

Participants of the wholesale market include: generating companies, electricity sales companies (including guaranteeing suppliers), electricity export / import operator, Federal Grid Company (in terms of electricity purchases to cover transmission losses), large electricity consumers. Participants of the wholesale market can act as electricity and capacity sellers and buyers.

Participants of the retail markets include: consumers, providers of public utilities, guaranteeing suppliers, electricity sales (supply) companies, electricity generators of retail markets, grid companies, participants of electricity dispatch.

*Wholesale electricity and capacity market.* The wholesale electricity and capacity market operates in accordance with the Resolution of the Russian Government No. 1172 dated 27 December 2010.

A wholesale market for electricity and capacity functions on the territory of the regions, which are integrated in pricing areas. European Russia and Urals are included in the first pricing area, Siberia is included in the second pricing area. In non-pricing areas (Arkhangelsk and Kaliningrad regions, Komi Republic, regions of the Far East), where the competitive market relationships are not possible due to technological reasons,

sales of electricity and capacity are carried out based on especial rules.

In the isolated energy systems which are not technically integrated into the country's unified energy system, there is no electricity and capacity wholesale market and electricity is supplied through the regulated markets.

#### Wholesale electricity market

The wholesale electricity market has a number of sectors varying in contractual terms, conditions and delivery time frames: sector of regulated contracts, day-ahead market, sector of unregulated bilateral contracts and the balancing market.

During 2015 the electricity traded in pricing zones of wholesale market was sold at unregulated prices excluding of volumes designated for delivery to population, groups of customers equivalent to population and customers located in North Caucasus and Republic of Tyva.

Electricity and capacity supply tariffs for the Russian Federation are calculated using the price indexing formulas determined by the Federal Tariff Service (hereinafter referred to as "the FTS").

Electricity and capacity supply volumes are determined based on the estimated consolidated balance of electricity production and supply prepared by the FTS, so that for the electricity and capacity generator supply under regulated contracts does not exceed 35 percent of the total electricity and capacity supply to the wholesale market determined by the decision on balance for such generator.

Electricity volumes that are not covered by the regulated contracts are sold at unregulated prices on the dayahead market (DAM) and balancing market (BM).

DAM is a competitive selection of seller and buyer price bids on the day ahead of actual electricity supply, including prices and volumes for each of 24 hours. The selection is managed by the Commercial Operator of the wholesale market (JSC TSA). On DAM, the price is determined by balancing the demand and supply, and such price is applied to all market participants. To mitigate the price manipulation risk, DAM introduced a system encouraging the participants to submit competitive price bids – in accordance with the trading rules, the lowest price bids for electricity supply are satisfied first.

Price indices and trade volumes in DAM are published daily on the web-site of JSC TSA.

Electricity volumes sold under bilateral contracts and on DAM constitute scheduled electricity consumption. However, actual consumption is inevitably different from the planned one. Deviations from scheduled production / consumption are traded on a real-time basis on BM, and the System Operator of the wholesale market (OJSC SO UES) holds additional tenders to select bids every three hours.

Under unregulated bilateral contracts, the market participants independently determine supply counter parties, prices and volumes.

#### Wholesale capacity market

Capacity is traded based on the following trading mechanisms:

- purchase / sale of capacity under capacity sales contracts, concluded as a result of capacity competitive selection of bids;
- purchase / sale of capacity under unregulated contracts;
- purchase / sale of capacity under contracts to provide capacity and under sale contracts of new nuclear power plants and hydroelectric power plants, similar to capacity sale contracts;
- purchase / sale of capacity produced by forced generators;
- purchase / sale of capacity under regulated contracts (within the volumes for delivery to population and groups of customers equivalent to population);
- purchase / sale of capacity produced by qualified renewable energy projects under contracts to provide capacity concluded on the results of the tender for the construction of renewable energy projects.

Competitive capacity selection (CCS) held by OJSC SO UES is the basis of capacity market and determines which power will be paid on the wholesale market.

Before 2015 CCS was held just for one year ahead (for the next year). The Resolution of the Russian Government No. 893 dated 27 August 2015 approved new rules for CCS and improved capacity trading principles on the wholesale market.

In 2015, the CCSs are conducted for 2016-2019. Starting from 2016, capacity under the CCS will be

(in millions of Russian Rubles unless noted otherwise)

annually selected for the year which is in three calendar years' time from the year of the respective CCS. The CCS procedures are performed for the pricing zones not separated into free power transfer zones. Indexation is performed if CCS is conducted for more than one year ahead. The CCS price is indexed for CPI decreased by 1 percent for the period from 1 January of the year following the year when the CCS was conducted to 1 January of the year of supply.

The CCS price represents the maximum of prices in the selected bids and the price at which the demand function takes a value equal to the cumulative volume of the capacity selected (including the capacity to be paid irrespective of the CCS results). The CCS price for each pricing zone is the same for all selected generating facilities. Non-selected capacity that failed to pass through the competitive selection is not paid for.

If the actual demand for capacity exceeds the volume of generating capacity selected, an adjusting CCS procedure can be conducted. Capacity commissioned under capacity supply contracts (CSC) entered into with heating generation sites and contracts with nuclear power plants and hydropower plants similar to CSC and that of generating sites that are required to maintain the technological operating modes of the energy system or supply heat ("forced" generators) is paid for irrespective of the CCS results.

During 2015, similar to trading operations with electricity, capacity is supplied under regulated contracts only in the volumes required for supply to the population, equivalent consumer categories and consumers operating in some parts of the wholesale market pricing zones, consisting Russian constituent territories as determined by the Russian Government (North Caucasus and Republic of Tyva).

During 2013 and until 1 May 2014 the volumes of capacity of hydropower plants located in the second pricing area (Siberia) were supplied for tariffs approved by the FTS. According to the Resolution of the Russian Government No. 374 dated 28 April 2014 approving changes to the regulations of the wholesale electricity and capacity market since 1 May 2014 35 percent of capacity are supplied for tariffs and 65 percent – at the price of capacity competitive selection of bids. The Resolution also provides phased increase in share of capacity of hydropower plants located in the second pricing area (Siberia) supplied at the price of capacity competitive selection of bids to 80 percent by 1 January 2016, to 100 percent by 1 January 2017.

#### Non-pricing zone of the Far East

Territories of the Amur Region, Primorsky Region, Khabarovsk Region, Jewish Autonomous Region and the Southern District of the Sakha Republic (Yakutia) are integrated into a single non-pricing zone of the wholesale electricity and capacity market of the Far East. There are specific features of managing electricity and capacity trading operations due to limitations in the competition among electricity suppliers and grid-imposed limitations for electricity flow.

Tariffs for electricity supplied by the Far East energy companies to the consumer (end-consumer tariffs) are approved by regional regulatory authorities based on the threshold tariff levels approved by the FTS for the regulated period.

The threshold tariff levels for electricity supplied to population or equivalent consumer categories and other consumers in the Russian constituent territories are determined by the FTS in accordance with the forecast of social and economic development in the Russian Federation for the regulated period.

The single buyer wholesale market model is implemented in the Far East non-pricing zone. Suppliers of the wholesale market supply electricity and capacity to the wholesale market using the tariffs established for them by the FTS.

The single buyer purchases electricity and capacity on the wholesale market at indicative prices calculated by JSC TSA based on the tariffs for suppliers of wholesale market approved by the FTS.

JSC TSA makes sure settlements between the electricity generators and buyers. Functions of the single buyer are assigned to PJSC DEK on the territory of Amur Region, Jewish Autonomous Region, Khabarovsk Region, Primorsky Region and the Southern District of the Sakha Republic (Yakutia).

However there are regions with only retail market operations – they are isolated energy systems of Kamchatsky Region, Magadan Region, Chukotsk Autonomous Region, Western and Central Regions of Sakha Republic (Yakutia) and Sakhalin Region where systems are not technically integrated into the unified energy system.

**Retail electricity market.** In the retail electricity markets the sales of electricity purchased on the wholesale electricity and capacity market and electricity of generating companies which are not participants of the wholesale market are carried out.

The retail market rules were approved by Resolution of the Government No. 442 dated 4 May 2013 "On functioning of retail electricity markets, complete and (or) partial constraint of electricity consumption" (hereinafter referred to as "the retail market rules").

In the territories of the constituent regions of the Russian Federation integrated into pricing zones of the wholesale market electricity is sold at unregulated prices except for electricity sales to population and equivalent consumer categories.

Electricity is supplied to population and groups of customers equivalent to population at regulated prices (tariffs) approved by executive authorities of the constituent regions of the Russian Federation in terms of state tariff regulation.

Regulated prices are established based on forecast of social and economic development of Russian Federation for the next year approved by the Government. The FTS determines the threshold levels for regulated tariffs for electricity supplied to population and equivalent consumer categories.

The guaranteeing suppliers sell electricity at unregulated prices within the threshold limits of unregulated prices determined and applied according to the retail market rules. Electricity sales (supply) companies sell electricity at unregulated prices. Electricity generators in the retail markets sell electricity at unregulated prices.

In the territories of the constituent regions of the Russian Federation integrated into non-pricing zones of the wholesale market for determination of prices for electricity supplied to final customers in the retail markets principles of prices translation of wholesale market are applied. Translation of prices of wholesale market is performed for all final customers except for population and equivalent consumer categories.

Translation prices calculated by electricity sales companies according to the Rules of application of the prices (tariffs) are determined based on regulated tariffs set up for the respective group of customers and cost of purchase of electricity and capacity by guaranteeing supplier (electricity sales company) in the wholesale market. Population and equivalent consumer categories pay for electricity under the tariffs set up by executive authorities of the constituent regions of the Russian Federation.

In the territories of isolated energy systems – sales of electricity to all consumer categories are carried out at regulated prices approved by the FTS and executive authorities of the constituent regions of the Russian Federation in terms of state tariff regulation in the territories where such energy systems are located.

*Heating market.* Operations of the heating market are regulated by Federal Law No.190-FZ "On Heating" dated 27 July 2010 and Resolution of the Government No. 1075 dated 22 October 2012 "On pricing of heating supply".

The Group's entities that are included into the segment RAO ES East Group are participants on the retail heating markets in the territories of their presence. Heat energy is supplied on the centralised basis from the heat power plants and boiling houses operated by the energy systems. And a number of energy systems are involved in supplies of heat, generating and distributing heat energy, while others – just generate heat energy.

Heating market provides for:

- supply of heat and heat transfer public utilities relating to hot water and heating supply needs;
- supply of heat for the entities' technological needs.

According to the Russian legislation, sales of heat energy are fully regulated.

Prices (tariffs) for heat supplied by utilities for all consumer groups are approved by executive authorities in the Russian constituent regions responsible for state regulation of prices (tariffs) within the threshold limits of tariffs approved by the FTS.

Service fee for maintenance of spare heat capacity when there is no heat consumption and fee for connection to the system of heating supply are also regulated by executive authorities in the Russian constituent regions responsible for state regulation of prices.

#### Note 2. Summary of significant accounting policies

**Basis of preparation.** These Consolidated Financial Statements have been prepared in accordance with International Financial Reporting Standards (hereinafter referred to as "IFRS") under the historical cost convention, as modified by the financial instruments initially recognised at fair value, revaluation of property, plant and equipment and available-for-sale financial assets. The principal accounting policies applied in the preparation of these Consolidated Financial Statements are set out below. These policies have been

consistently applied to all the periods presented, unless otherwise stated.

Each company of the Group individually maintains its own books of accounts and prepares its statutory financial statements in accordance with Russian standards of accounting (hereinafter referred to as "RSA"). The accompanying consolidated financial statements are based on the statutory records with adjustments and reclassifications made for the purpose of fair presentation in accordance with IFRS.

*Functional and presentation currency.* The functional currency of the Company and its subsidiaries, and the Group's presentation currency, is the national currency of the Russian Federation, Russian Rubles.

**Foreign currency translation.** Monetary assets and liabilities, which are held by the Group's entities and denominated in foreign currencies at the end of the reporting period, are translated into Russian Rubles at the exchange rates prevailing at that date. Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transaction. Gains and losses resulting from the settlement of such transactions and translation of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement.

As at 31 December 2015, the official rate of exchange, as determined by the Central Bank of the Russian Federation, between Russian Ruble and US Dollar (hereinafter referred to as "USD") was RR 72.88: USD 1.00 (31 December 2014: RR 56.26: USD 1.00), between Russian Ruble and Euro was RR 79.70: EUR 1.00 (31 December 2014: RR 68.34: EUR 1.00).

**Consolidated financial statements.** Subsidiaries are those investees, including structured entities, that the Group controls because the Group (i) has power to direct relevant activities of the investees that significantly affect their returns, (ii) has exposure, or rights, to variable returns from its involvement with the investees, and (iii) has the ability to use its power over the investees to affect the amount of investor's returns.

The existence and effect of substantive rights, including substantive potential voting rights, are considered when assessing whether the Group has power over another entity. For a right to be substantive, the holder must have practical ability to exercise that right when decisions about the direction of the relevant activities of the investee need to be made. The Group may have power over an investee even when it holds less than majority of voting power in an investee. In such a case, the Group assesses the size of its voting rights relative to the size and dispersion of holdings of the other vote holders to determine if it has de-facto power over the investee. Protective rights of other investors, such as those that relate to fundamental changes of investee's activities or apply only in exceptional circumstances, do not prevent the Group from controlling an investee. Subsidiaries are consolidated from the date on which control is transferred to the Group (acquisition date) and are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for the acquisition of subsidiaries other than those acquired from parties under common control. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest.

The Group measures non-controlling interest that represents present ownership interest and entitles the holder to a proportionate share of net assets in the event of liquidation on a transaction by transaction basis, either at: (a) fair value, or (b) the non-controlling interest's proportionate share of net assets of the acquiree.

Goodwill is measured by deducting the net assets of the acquiree from the aggregate of the consideration transferred for the acquiree, the amount of non-controlling interest in the acquiree and the fair value of an interest in the acquiree held immediately before the acquisition date. Any negative amount ("negative goodwill" or a "bargain purchase") is recognised in profit or loss, after management reassesses whether it identified all the assets acquired and all the liabilities and contingent liabilities assumed and reviews the appropriateness of their measurement.

The consideration transferred for the acquiree is measured at the fair value of the assets given up, equity instruments issued and liabilities incurred or assumed, including fair value of assets or liabilities from contingent consideration arrangements but excludes acquisition related costs such as advisory, legal, valuation and similar professional services. Transaction costs related to the acquisition and incurred for issuing equity instruments are deducted from equity; transaction costs incurred for issuing debt as part of the business combination are deducted from the carrying amount of the debt and all other transaction costs associated with the acquisition are expensed.

Intercompany transactions, balances and unrealised gains on transactions between the Group's entities are eliminated; unrealised losses are also eliminated unless the cost cannot be recovered. The Company and all of its subsidiaries use uniform accounting policies consistent with the Group's policies.

Non-controlling interest is that part of the net results and of the equity of a subsidiary attributable to interests which are not owned, directly or indirectly, by the Company. Non-controlling interest forms a separate component of the Group's equity.

**Purchases and sales of non-controlling interests.** The Group applies the economic entity model to account for transactions with owners of non-controlling interest in transactions that do not result in a loss of control. Any difference between the purchase consideration and the carrying amount of non-controlling interest acquired is recorded as a capital transaction directly in equity. The Group recognises the difference between sales consideration and the carrying amount of non-controlling interest sold as a capital transaction in the statement of changes in equity.

Acquisition of subsidiaries from parties under common control. Acquisitions of subsidiaries from parties under common control are accounted for using the predecessor values method. Under this method the consolidated financial statements of the combined entity are presented as if the businesses had been combined from the beginning of the earliest period presented or the date when the combining entities were first brought under common control if later. The assets and liabilities of the subsidiary transferred under common control are at the predecessor entity's carrying amounts. The predecessor entity is considered to be the highest reporting entity in which the subsidiary's IFRS financial information was consolidated. Related goodwill inherent in the predecessor entity's original acquisitions is also recorded in these consolidated financial statements. Any difference between the carrying amount of net assets, including the predecessor entity's goodwill, and the consideration for the acquisition is accounted for in these consolidated financial statements of the combined entity are presented as if the businesses had been combined from the beginning of the earliest period presented as if the businesses had been combined from the beginning of the earliest period presented for using predecessor values method the consolidated financial statements of the combined entity are presented as if the businesses had been combined from the beginning of the earliest period presented, i.e. retrospectively except for acquisition of subsidiaries acquired exclusively with a view for resale which are accounted for using predecessor values method prospectively from the acquisition date.

**Investments in associates and joint ventures.** Investments in associates and joint ventures are accounted for using the equity method of accounting, based upon the percentage of ownership held by the Group. Associates are entities over which the Company has significant influence but not control, generally accompanying a shareholding of between 20 and 50 percent of the voting rights. Investments in associates are accounted for using the equity method of accounting and are initially recognised at cost. Dividends received from associates reduce the carrying value of the investment in associates. Other post-acquisition changes in the Group's share of net assets of an associate are recognised as follows: (i) the Group's share of profits or losses of associates is recorded in the consolidated profit or loss for the year as profit or loss in respect of associates and joint ventures, (ii) the Group's share of other comprehensive income and presented separately, and (iii) all other changes in the Group's share of the carrying value of net assets are recognised in profit or loss within the profit or loss in respect of associates and joint ventures.

However, when the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Joint control is defined by making of decisions about the relevant activities required the unanimous consent of the parties sharing control.

The Group discontinues the use of the equity method from the date on which it ceases to have joint control over, or have significant influence on joint ventures and associates.

Unrealised gains on transactions with associates and joint ventures are eliminated to the extent of the Group's interest in the entity, unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

**Disposals of subsidiaries, associates or joint ventures.** When the Group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are recycled to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss

#### where appropriate.

**Property, plant and equipment.** Property, plant and equipment in the statement of financial position includes assets under construction for future use as property, plant and equipment. Property, plant and equipment except for office buildings, land and assets under construction are stated at revalued amounts less accumulated depreciation and provision for impairment (where required). Office building, land and assets under construction office building.

Property, plant and equipment except for office buildings, land and assets under construction are subject to revaluation with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period. Increases in the carrying amount arising on revaluation are credited to other comprehensive income and increase the revaluation surplus in equity. Decreases that offset previous increases of the same asset are recognised in other comprehensive income and decrease the previously recognised revaluation surplus in equity; all other decreases are charged to profit or loss for the year. Any accumulated depreciation at the date of revaluation is eliminated against the gross amount of the asset.

The revaluation surplus included in equity is transferred directly to retained earnings when the revaluation surplus is realised on disposal of the asset.

The Group charges deferred tax liabilities directly to other comprehensive income in respect of revaluation of property, plant and equipment that are recorded directly in other comprehensive income.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. Costs of minor repairs and day-to-day maintenance are expensed when incurred. Cost of replacing major parts or components of property, plant and equipment items are capitalised and the replaced part is retired.

Social assets are not capitalised if they are not expected to result in future economic benefits to the Group. Costs associated with fulfilling the Group's social responsibilities are expensed as incurred.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss for the year.

**Depreciation.** Depreciation on items of property, plant and equipment (except for land and assets under construction) is calculated using the straight-line method over their estimated useful lives.

The useful lives of property, plant and equipment are subject to annual assessment by management and if expectations differ from previous estimates, the changes of useful lives are accounted for as a change in an accounting estimate prospectively.

The average useful lives of property, plant and equipment by type of facility, in years, were as follows:

Type of facility	Average useful lives
Production buildings	25–80
Facilities	10–100
Plant and equipment	5–40
Other	3–30

Depreciation is charged once an asset is available for service. Land and assets under construction are not depreciated.

*Impairment of property, plant and equipment.* Impairment reviews for property, plant and equipment are carried out when there is an indication that impairment may have occurred, or where it is otherwise required to ensure that property, plant and equipment are not carried above their estimated recoverable amounts (Note 7). If such indication exists, management estimates the recoverable amount which is determined as the higher of an asset's fair value less costs of disposal and its value in use. Fair value less costs of disposal represents the amount that can be generated through the sale of assets. Value in use represents the present value of expected future cash flows discounted on a pre-tax basis, using the estimated cost of capital of the cash-generating unit.

The carrying amount of the asset is reduced to the recoverable amount and the impairment loss is recognised in profit or loss for the year to the extent it exceeds the previous revaluation surplus in equity. An impairment loss recognised for an asset in prior years is reversed where appropriate if there has been a change in the estimates used to determine the asset's value in use or fair value less costs of disposal.

**Investment property.** Investment property is property held by the Group to earn rental income which is not occupied by the Group (Note 10). Investment properties are stated at cost. If any indication exists that investment properties may be impaired, the Group estimates the recoverable amount as the higher of value in use and fair value less costs of disposal. The carrying amount of an investment property is written down to its recoverable amount through a charge to profit or loss for the year. An impairment loss recognised in prior years is reversed if there has been a subsequent change in the estimates used to determine the asset's recoverable amount.

**Intangible assets and goodwill.** The Group's intangible assets other than goodwill have definite useful lives and primarily include customer base acquired in business combination (Note 10), which is amortised over 5 years, and capitalised computer software. Intangible assets are amortised using the straight-line method over their useful lives. If impaired, the carrying amount of intangible assets is written down to the higher of value in use and fair value less costs of disposal. Goodwill is carried at cost less accumulated impairment losses, if any. The Group tests goodwill for impairment at least annually and whenever there are indications that goodwill may be impaired. Goodwill is allocated to the cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the business combination. Such units or groups of units represent the lowest level at which the Group monitors goodwill and are not larger than an operating segment.

Gains or losses on disposal of an operation within a cash generating unit to which goodwill has been allocated include the carrying amount of goodwill associated with the operation disposed of, generally measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit which is retained.

*Financial instruments – key measurement terms.* Depending on their classification financial instruments are carried at fair value or amortised cost as described below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of fair value is price in an active market. An active market is one in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Valuation techniques such as discounted cash flow models or models based on recent arm's length transactions or consideration of financial data of the investees are used to measure fair value of certain financial instruments for which external market pricing information is not available. The Group uses such valuation techniques of fair value which are the most acceptable in the circumstances and as much as possible use the observable basic data.

Fair value measurements are analysed by level in the fair value hierarchy as follows:

- level 1 are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities;
- level 2 measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices);
- level 3 measurements are valuations not based on solely observable market data (that is, the measurement requires significant unobservable inputs).

For disclosure of information on fair value the Group classified assets and liabilities on the basis of an appropriate level of hierarchy of fair value as it is stated above (Note 31).

*Transaction costs* are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial instrument. An incremental cost is one that would not have been incurred if the transaction had not taken place. Transaction costs include fees and commissions paid to agents, advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs.

Amortised cost is the amount at which the financial instrument was recognised at initial recognition less any principal repayments, plus accrued interest, and for financial assets less any write-down for incurred impairment losses. Accrued interest includes amortisation of transaction costs deferred at initial recognition and of any premium or discount to maturity amount using the effective interest method. Accrued interest including both accrued coupon and amortised discount or premium (including fees deferred at origination, if any), are not presented separately and are included in the carrying values of related items in the statement of financial position.

(in millions of Russian Rubles unless noted otherwise)

The effective interest method is a method of allocating interest income or interest expense over the relevant period, so as to achieve a constant periodic rate of interest (effective interest rate) on the carrying amount. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the net carrying amount of the financial instrument. The effective interest rate discounts cash flows of variable interest instruments to the next interest repricing date, except for the premium or discount which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument. The present value calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate.

*Classification of financial assets.* Financial assets have the following categories: (i) loans and receivables; (ii) available-for-sale financial assets; (iii) financial assets held to maturity and (iv) financial assets at fair value through profit or loss. The description of categories of financial assets of the Group is given below.

Loans and receivables are unquoted non-derivative financial assets with fixed or determinable payments.

*Financial assets at fair value through profit or loss.* This category is presented by derivative financial instruments which are carried at their fair value. All derivative instruments are carried as assets when fair value is positive and as liabilities when fair value is negative. Changes in the fair value of derivative instruments are included in profit or loss for the year. The Group does not apply hedge accounting.

All other financial assets are included in the *available-for-sale* category, which includes investment securities which the Group intends to hold for an indefinite period of time and which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

**Classification of financial liabilities.** Financial liabilities have the following measurement categories: (i) financial liabilities at fair value through profit or loss and (ii) other financial liabilities. All financial liabilities of the Group including loans are categorised as other and carried at amortized cost.

*Initial recognition of financial instruments.* Trading investments, derivatives and other financial instruments at fair value through profit or loss are initially recorded at fair value. All other financial instruments are initially recorded at fair value plus transaction costs. Fair value at initial recognition is best evidenced by the transaction price. A gain or loss on initial recognition is only recorded if there is a difference between fair value and transaction price which can be evidenced by other observable current market transactions in the same instrument or by a valuation technique whose inputs include only data from observable markets.

**Derecognition of financial assets.** The Group derecognises financial assets when (a) the assets are redeemed or the rights to cash flows from the assets otherwise expire or (b) the Group has transferred the rights to the cash flows from the financial assets or entered into a qualifying pass-through arrangement whilst (i) also transferring substantially all the risks and rewards of ownership of the assets or (ii) neither transferring nor retaining substantially all the risks and rewards of ownership but not retaining control.

Control is retained if the counterparty does not have the practical ability to sell the asset in its entirety to an unrelated third party without needing to impose additional restrictions on the sale.

Available-for-sale financial assets. Available-for-sale financial assets are carried at fair value. Interest income on available-for-sale debt securities is calculated using the effective interest method and recognised in profit or loss for the year as finance income. Dividends on available-for-sale equity instruments are recognised in profit or loss for the year as finance income when the Group's right to receive payment is established and it is probable that the dividends will be collected. All other elements of changes in the fair value are recognised in other comprehensive income until the investment is derecognised or impaired at which time the cumulative gain or loss is reclassified from other comprehensive income to finance income in profit or loss for the year.

Impairment losses are recognised in profit or loss for the year when incurred as a result of one or more events ("loss events") that occurred after the initial recognition of available-for-sale financial assets. A significant or prolonged decline in the fair value of an equity security below its cost is an indicator that it is impaired. The cumulative impairment loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that asset previously recognised in profit or loss – is reclassified from other comprehensive income to finance costs in profit or loss for the year. Impairment losses on equity instruments are not reversed and any subsequent gains are recognised in other comprehensive income. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss

was recognised in profit or loss, the impairment loss is reversed through current period's profit or loss.

**Cash and cash equivalents.** Cash and cash equivalents include cash in hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less. Cash and cash equivalents are carried at amortised cost using the effective interest method.

*Trade and other receivables.* Trade and other receivables are carried at amortised cost using the effective interest method.

*Impairment of financial assets carried at amortised cost.* Impairment losses are recognised in profit or loss when incurred as a result of one or more events ("loss events") that occurred after the initial recognition of the financial asset and which have an impact on the amount or timing of the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. If the Group determines that no objective evidence exists that impairment was incurred for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. The primary factors that the Group considers in determining whether a financial asset is impaired are its overdue status and realisability of related collateral, if any. The following other principal criteria are also used to determine whether there is objective evidence that an impairment loss has occurred: (i) any portion or instalment is overdue and the late payment cannot be attributed to a delay caused by the settlement systems; (ii) the counterparty experiences a significant financial difficulty as evidenced by its financial information that the Group obtains; (iii) the counterparty considers bankruptcy or a financial reorganisation; (iv) there is adverse change in the payment status of the counterparty as a result of changes in the national or local economic conditions that impact the counterparty; or (v) the value of collateral, if any, significantly decreases as a result of deteriorating market conditions.

If the terms of an impaired financial asset held at amortised cost are renegotiated or otherwise modified because of financial difficulties of the counterparty, impairment is measured using the original effective interest rate before the modification of terms. The renegotiated asset is then derecognised and a new asset is recognised at its fair value only if the risks and rewards of the asset substantially changed. This is normally evidenced by a substantial difference between the present values of the original cash flows and the new expected cash flows.

Impairment losses are always recognised through an allowance account to write down the asset's carrying amount to the present value of expected cash flows (which exclude future credit losses that have not been incurred) discounted at the original effective interest rate of the asset. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account through profit or loss for the year.

Uncollectible assets are written off against the related impairment loss provision after all the necessary procedures to recover the asset have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are credited to the impairment loss account within the profit or loss for the year.

**Prepayments.** Prepayments are carried at cost less provision for impairment. A prepayment is classified as non-current when the goods or services relating to the prepayment are expected to be obtained after one year, or when the prepayment relates to an asset which will itself be classified as non-current upon initial recognition. Prepayments to acquire assets are transferred to the carrying amount of the asset once the Group has obtained control of the asset and it is probable that future economic benefits associated with the asset will flow to the Group. Other prepayments are written off to profit or loss when the goods or services relating to the prepayment are received. If there is an indication that the assets, goods or services relating to a prepayment will not be received, the carrying value of the prepayment is written down accordingly and a corresponding impairment loss is recognised in profit or loss for the year.

*Inventories.* Inventories are recorded at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less selling expenses. Cost of inventory that is expensed is determined on the weighted average basis.

**Non-current assets classified as held for sale. Discontinued operations.** Non-current assets and disposal groups (which may include both non-current and current assets) are classified in the consolidated statement of financial position as "non-current assets classified as held for sale" if their carrying amount will be recovered principally through a sale transaction (including loss of control of a subsidiary holding the assets) within 12 months after the reporting period. Assets are reclassified when all of the following conditions are met: (i) the assets are available for immediate sale in their present condition; (ii) the Group's

management approved and initiated an active programme to locate a buyer; (iii) the assets are actively marketed for a sale at a reasonable price; (iv) the sale is expected within one year; and (v) it is unlikely that significant changes to the plan to sell will be made or that the plan will be withdrawn.

Non-current assets or disposal groups classified as held for sale in the current period's consolidated statement of financial position are not reclassified or re-presented in the comparative consolidated statement of financial position to reflect the classification at the end of the current period.

A disposal group is a group of assets (current and / or non-current) to be disposed of, by sale or otherwise, together as a group in a single transaction, and liabilities directly associated with those assets that will be transferred in the transaction. Goodwill is included if the disposal group includes an operation within a cash-generating unit to which goodwill has been allocated on acquisition. If reclassification is required, both the current and non-current portions of an asset are reclassified.

Held for sale disposal groups as a whole are measured at the lower of their carrying amount and fair value less costs of disposal. Held for sale property, plant and equipment, investment property and intangible assets are not depreciated or amortised. Reclassified non-current financial instruments and deferred taxes are not subject to the write down to the lower of their carrying amount and fair value less costs of disposal.

Liabilities directly associated with the disposal group that will be transferred in the disposal transaction are reclassified and presented separately in the consolidated statement of financial position.

A discontinued operation is a component of the Group that either has been disposed of, or that is classified as held for sale, and: (i) represents a separate major line of business or geographical area of operations; (ii) is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; or (iii) is a subsidiary acquired exclusively with a view to resale. Earnings and cash flows of discontinued operations, if any, are disclosed separately from continuing operations with comparatives being re-presented.

Disposal groups or non-current assets that ceases to be classified as held for sale are measured at the lower of (i) its carrying amount before the asset or disposal group was classified as held for sale, adjusted for any depreciation, amortisation or revaluations that would have been recognised had the asset or disposal group not been classified as held for sale, and (ii) its recoverable amount at the date of the subsequent decision not to sell.

**Income taxes.** Income taxes have been provided for in the financial statements in accordance with legislation enacted or substantively enacted by the end of the reporting period. The income tax charge comprises current tax and deferred tax and is recognised in profit or loss for the year except if it is recognised in other comprehensive income or directly in equity because it relates to transactions that are also recognised, in the same or a different period, in other comprehensive income or directly in equity.

Current tax is the amount expected to be paid to, or recovered from, the taxation authorities in respect of taxable profits or losses for the current and prior periods. Taxes other than on income are recorded within operating expenses. Taxable profits or losses are based on estimates if financial statements are authorised prior to filing relevant tax returns.

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. In accordance with the initial recognition exemption, deferred taxes are not recorded for temporary differences on initial recognition of an asset or a liability in a transaction other than a business combination if the transaction, when initially recorded, affects neither accounting nor taxable profit. Deferred tax liabilities are not recorded for temporary differences on initial recognition of goodwill and subsequently for goodwill which is not deductible for tax purposes. Deferred tax balances are measured at tax rates enacted or substantially enacted at the end of the reporting period which are expected to apply to the period when the temporary differences will reverse or the tax loss carry forwards will be utilised.

Deferred tax assets for deductible temporary differences and tax loss carry forwards are recorded only to the extent that it is probable that the temporary difference will reverse in the future and there is sufficient future taxable profit available against which the deductions can be utilised.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis. Deferred tax assets and liabilities are netted only within the individual companies of the Group.

The Group controls the reversal of temporary differences relating to taxes chargeable on dividends from

(in millions of Russian Rubles unless noted otherwise)

subsidiaries or on gains upon their disposal. The Group does not recognise deferred tax liabilities on such temporary differences except to the extent that management expects the temporary differences to reverse in the foreseeable future.

**Uncertain tax positions.** The Group's uncertain tax positions are reassessed by management at the end of each reporting period. Liabilities are recorded for income tax positions that are determined by management as more likely than not to result in additional taxes being levied if the positions were to be challenged by the tax authorities. The assessment is based on the interpretation of tax laws that have been enacted or substantively enacted by the end of the reporting period, and any known court or other rulings on such issues. Liabilities for penalties, interest and taxes other than on income are recognised based on management's best estimate of the expenditure required to settle the obligations at the end of the reporting period. Adjustments for uncertain income tax positions are recorded within the income tax charge.

**Debt.** Debt is recognised initially at its fair value. Fair value is determined using the prevailing market rate of interest for a similar instrument, if significantly different from the transaction price. In subsequent periods, debt is stated at amortised cost using the effective interest method; any difference between the fair value of the proceeds (net of transaction costs) and the redemption amount is recognised in the consolidated income statement as an interest expense over the period of the debt obligation.

*Capitalisation of borrowing costs.* Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial time to get ready for intended use or sale (qualifying assets) are capitalised as part of the costs of those assets, if the commencement date for capitalisation is on or after 1 January 2009.

The commencement date for capitalisation is when (i) the Group incurs expenditures for the qualifying asset; (ii) it incurs borrowing costs; and (iii) it undertakes activities that are necessary to prepare the asset for its intended use or sale.

Capitalisation of borrowing costs continues up to the date when the assets are substantially ready for their use or sale. The Group capitalises borrowing costs that could have been avoided if it had not made capital expenditure on qualifying assets. Borrowing costs capitalised are calculated at the group's average funding cost (the weighted average interest cost is applied to the expenditures on the qualifying assets), except to the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset. Where this occurs, actual borrowing costs incurred less any investment income on the temporary investment of those borrowings are capitalised.

Interest payments capitalised as part of the cost of an assets are classified as cash outflows from financing activities in Consolidated Statement of Cash Flows.

*Employee benefits.* Wages, salaries, contributions to the Russian Federation state pension and social insurance funds, paid annual leave and sick leave, bonuses, and non-monetary benefits (such as health services) are accrued in the year in which the associated services are rendered by the employees of the Group.

*Defined benefit plans.* The Group operates defined benefit plans that cover the majority of its employees. Defined benefit plans define the amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service, minimum tariff rate of remuneration and others.

The net liability recognised in the statement of financial position in respect of defined benefit pension plans operated by the Group is the present value of the defined benefit obligation at the end of the reporting period less fair value of plan assets.

The defined benefit obligations are calculated by independent actuary using the projected unit credit method. The present value of the defined benefit obligations are determined by discounting the estimated future cash outflows using interest rates of government bonds that are denominated in the currency in which the benefits will be paid associated with the operation of the plans, and that have terms to maturity approximating the terms of the related pension liabilities.

Actuarial gains and losses arising from remeasurement of pension benefit obligations are recognised in other comprehensive income. Past service cost is immediately recognised in profit or loss within operating expenses.

*Defined contribution plans.* For defined contribution plans, the Group pays contributions and has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. In the normal course of business the Group contributes to the Russian Federation defined contribution state pension scheme on behalf of its employees. Mandatory contributions to

the governmental pension scheme are expensed when incurred and included in employee benefit expenses and payroll taxes in the consolidated income statement.

*Other post-employment benefit obligations.* The Group pays a one-off financial aid on occasion of an employee's jubilee. The amount of the benefit depends on one or more factors, such as the age, length of service in the company and salary used in the Group companies and others.

For the purpose of calculating benefit obligations of these types, actuarial gains and losses arising as a result of adjustments or changes in actuarial assumptions are recognised within profit or loss in the consolidated statement of income in the period when they arise. All other aspects of accounting for these obligations are similar to those of accounting for defined benefit obligations.

**Finance lease liabilities.** Where the Group is a lessee in a lease which transferred substantially all the risks and rewards incidental to ownership to the Group, the assets leased are capitalised in property, plant and equipment at the commencement of the lease at the lower of the fair value of the leased asset and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of future finance charges, are included in borrowings. The interest cost is charged to profit or loss over the lease period using the effective interest method. The assets acquired under finance leases are depreciated over their useful life or the shorter lease term if the Group is not reasonably certain that it will obtain ownership by the end of the lease term.

**Operating leases.** Where the Group is a lessee in a lease which does not transfer substantially all the risks and rewards incidental to ownership from the lessor to the Group, the total lease payments are charged to profit or loss for the year on a straight-line basis over the lease term. The lease term is the non-cancellable period for which the lessee has contracted to lease the asset together with any further terms for which the lessee has the option to continue to lease the asset, with or without further payment, when at the inception of the lease it is reasonably certain that the lessee will exercise the option.

When assets are leased out under an operating lease, the lease payments receivable are recognised as rental income on a straight-line basis over the lease term.

*Environmental liabilities.* Liabilities for environmental remediation are recorded where there is a present obligation, the payment is probable and reliable estimates exist.

**Revenue recognition.** Revenue is recognised on the delivery of electricity and heat, provisioning for capacity, supply of non-utility services and on the dispatch of goods during the period. Revenue from retail operations is recognised on delivery of electricity and heat to the customer. Revenue amounts are presented exclusive of value added tax.

Revenue transactions under free bilateral contracts are shown net of related purchases of equivalent electricity volumes which the market participant is obliged to make in accordance with the industry regulations. Additional turnover in the amount of RR 6,288 million for the year ended 31 December 2015 (for the year ended 31 December 2014: RR 10,064 million) is shown net for presentation purposes to reflect the economic substance of transactions.

**Government grants.** Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions. Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to profit or loss on a straight line basis over the expected lives of the related assets. Government grants are included in cash flows from operating activities.

*Earnings per share.* The earnings per share are determined by dividing the profit attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the reporting period, excluding the average number of treasury shares held by the Group.

**Share capital.** Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds. Any excess of the placement value over the par value of shares issued is recorded as share premium in equity.

**Treasury shares.** Where the Company or its subsidiaries purchase the Company's equity instruments, the consideration paid, including any directly attributable incremental costs, net of income taxes, is deducted from equity attributable to the Company's owners until the equity instruments are reissued, disposed of or cancelled. In case the consideration paid is non-cash asset, the treasury shares received are recognised at the fair value of this asset. Where such shares are subsequently sold or reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the Company's owners.

(in millions of Russian Rubles unless noted otherwise)

**Dividends.** Dividends are recorded as a liability and deducted from equity in the period in which they are declared and approved. Any dividends declared after the reporting period and before the financial statements are authorised for issue are disclosed in the subsequent events note.

**Provisions for liabilities and charges.** Provisions for liabilities and charges are non-financial liabilities of uncertain timing of amount. They are accrued when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as an interest expense.

Levies and charges, such as taxes other than income tax or regulatory fees based on information related to a period before the obligation to pay arises, are recognised as liabilities when the obligating event that gives rise to pay a levy occurs, as identified by the legislation that triggers the obligation to pay the levy. If a levy is paid before the obligating event, it is recognised as a prepayment.

**Social expenditure.** To the extent that the Group's contributions to social programmes benefit the community at large without creating constructive obligations to provide such benefits in the future and are not restricted to the Group's employees, they are recognised in the income statement as incurred.

*Financial guarantees.* Financial guarantees are irrevocable contracts that require the Group to make specified payments to reimburse the holder of the guarantee for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument. Financial guarantees are initially recognised at their fair value, which is normally evidenced by the amount of fees received. This amount is amortised on a straight-line basis over the life of the guarantee. At the end of each reporting period, the guarantees are measured at the higher of (i) the remaining unamortised balance of the amount at initial recognition, and (ii) the best estimate of expenditure required to settle the obligation at the end of the reporting period.

**Segment reporting.** Segments are reported in a manner consistent with the internal reporting provided to the Group's chief operating decision maker. Segments whose revenue, result or assets are ten percent or more of all the segments are reported separately.

#### Critical accounting estimates and judgments in applying accounting policies

The Group makes estimates and assumptions that affect the amounts recognised in the Consolidated Financial Statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgments, apart from those involving estimations, in the process of applying the accounting policies. Judgments that have the most significant effect on the amounts recognised in the Consolidated Financial Statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

*Impairment of non-financial assets.* At each reporting date management assesses whether there is any indication of impairment of property, plant and equipment. If any such indication exists, management estimates the recoverable amount, which is determined as the higher of an asset's fair value less costs of disposal and its value in use. The carrying amount of the asset is reduced to the recoverable amount and the impairment loss is recognised in the consolidated income statement to the extent it exceeds any previous revaluation surplus held in equity. An impairment loss recognised for an asset in prior years may be reversed if there has been a positive change in the estimates used to determine the asset's value in use or fair value less costs of disposal.

Accounting for impairment of non-financial assets includes impairment of property, plant and equipment and impairment of investments in associates.

The effect of these critical accounting estimates and assumptions is disclosed in Notes 7 and 8.

**Recognition of deferred tax assets.** At each reporting date management assesses recoverability of deferred tax assets arising from operating losses and asset impairments in the context of the current economic environment, particularly when current and expected future profits have been adversely affected by market conditions. Management considers first the future reversal of existing deferred tax liabilities and then considers future taxable profits when evaluating deferred tax assets. The assessment is made on a tax payer basis. The future taxable profits and the amount of tax benefits that are probable in the future are

based on the medium term business plans of the Group companies prepared by management and extrapolated results thereafter.

Management considered the recoverability of recognised deferred tax assets, including those on tax losses carried forward, as probable (Note 16).

**Useful life of property, plant and equipment.** The estimation of the useful life of an item of property, plant and equipment is a matter of management judgment based upon experience with similar assets and other factors. In determining the useful life of an asset, management considers the expected usage, estimated technical obsolescence, physical wear and tear, warranty terms as well as the environment in which the asset is operated. Changes in any of these conditions or estimates may result in adjustments for future depreciation rates which can affect the reported income.

#### Reclassifications

Certain reclassifications have been made to prior year data to conform to the current year presentation. These reclassifications are not material.

#### Adoption of New or Revised Standards and Interpretations

The following new standards and interpretations became effective from 1 January 2015 but did not have any material impact on the Group's consolidated financial statements:

- Amendments to IAS 19 "Defined benefit plans: Employee contributions" (issued in November 2013 and effective for annual periods beginning 1 July 2014).
- Annual Improvements to IFRSs 2012 (issued in December 2013 and effective for annual periods beginning on or after 1 July 2014).
- Annual Improvements to IFRSs 2013 (issued in December 2013 and effective for annual periods beginning on or after 1 July 2014).

#### Note 3. New accounting pronouncements

Certain new standards and interpretations have been issued that are mandatory for the annual periods beginning on or after 1 January 2016 or later, and which the Group has not early adopted. These standards and interpretations have been approved for adoption in the Russian Federation unless noted otherwise.

*IFRS 9, Financial Instruments: Classification and Measurement* (amended in July 2014 and effective for annual periods beginning on or after 1 January 2018). Key features of the new standard are:

- Financial assets are required to be classified into three measurement categories: those to be
  measured subsequently at amortised cost, those to be measured subsequently at fair value through
  other comprehensive income (FVOCI) and those to be measured subsequently at fair value through
  profit or loss (FVPL).
- Classification for debt instruments is driven by the entity's business model for managing the financial
  assets and whether the contractual cash flows represent solely payments of principal and interest
  (SPPI). If a debt instrument is held to collect, it may be carried at amortised cost if it also meets the
  SPPI requirement. Debt instruments that meet the SPPI requirement that are held in a portfolio
  where an entity both holds to collect assets' cash flows and sells assets may be classified as FVOCI.
  Financial assets that do not contain cash flows that are SPPI must be measured at FVPL (for
  example, derivatives). Embedded derivatives are no longer separated from financial assets but will
  be included in assessing the SPPI condition.
- Investments in equity instruments are always measured at fair value. However, management can make an irrevocable election to present changes in fair value in other comprehensive income, provided the instrument is not held for trading. If the equity instrument is held for trading, changes in fair value are presented in profit or loss.
- Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The key change is that an entity will be required to present the effects of changes in own credit risk of financial liabilities designated at fair value through profit or loss in other comprehensive income.

- IFRS 9 introduces a new model for the recognition of impairment losses the expected credit losses (ECL) model. There is a"three stage" approach which is based on the change in credit quality of financial assets since initial recognition. In practice, the new rules mean that entities will have to record an immediate loss equal to the 12-month ECL on initial recognition of financial assets that are not credit impaired (or lifetime ECL for trade receivables). Where there has been a significant increase in credit risk, impairment is measured using lifetime ECL rather than 12-month ECL. The model includes operational simplifications for lease and trade receivables.
- Hedge accounting requirements were amended to align accounting more closely with risk management. The standard provides entities with an accounting policy choice between applying the hedge accounting requirements of IFRS 9 and continuing to apply IAS 39 to all hedges because the standard currently does not address accounting for macro hedging.

The Group is currently assessing the impact of the new standard on its consolidated financial statements.

**IFRS 15, Revenue from Contracts with Customers** (issued in May 2014 and effective for the periods beginning on or after 1 January 2018). The new standard introduces the core principle that revenue must be recognised when the goods or services are transferred to the customer, at the transaction price. Any bundled goods or services that are distinct must be separately recognised, and any discounts or rebates on the contract price must generally be allocated to the separate elements. When the consideration varies for any reason, minimum amounts must be recognised if they are not at significant risk of reversal. Costs incurred to secure contracts with customers have to be capitalised and amortised over the period when the benefits of the contract are consumed. The Group is currently assessing the impact of the new standard on its financial statements.

*IFRS 16, Leases (issued in January 2016 and effective for annual periods beginning on or after 1 January 2019; this standard has not been approved for adoption in the Russian Federation).* The new standard sets out the principles for the recognition, measurement, presentation and disclosure of leases. All leases result in the lessee obtaining the right to use an asset at the start of the lease and, if lease payments are made over time, also obtaining financing. Accordingly, IFRS 16 eliminates the classification of leases as either operating leases or finance leases as is required by IAS 17 and, instead, introduces a single lessee accounting model. Lessees will be required to recognise: (a) assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value; and (b) depreciation of lease assets separately from interest on lease liabilities in the income statement. IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently. The Group is currently assessing the impact of the new standard on its consolidated financial statements.

The following other new pronouncements are not expected to have any material impact on the Group when adopted:

- Accounting for Acquisitions of Interests in Joint Operations Amendments to IFRS 11 (issued in May 2014 and effective for the periods beginning on or after 1 January 2016).
- Clarification of Acceptable Methods of Depreciation and Amortisation Amendments to IAS 16 and IAS 38 (issued in May 2014 and effective for the periods beginning on or after 1 January 2016).
- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture -Amendments to IFRS 10 and IAS 28 (issued in September 2014 and effective for annual periods beginning on or after 1 January 2016; these amendments have not been approved for adoption in the Russian Federation).
- Annual Improvements to IFRSs 2014 (issued in September 2014 and effective for annual periods beginning on or after 1 January 2016).
- Disclosure Initiative Amendments to IAS 1 (issued in December 2014 and effective for annual periods on or after 1 January 2016).
- Recognition of Deferred Tax Assets for Unrealised Losses Amendments to IAS 12 (issued in January 2016 and effective for annual periods beginning on or after 1 January 2017; these amendments have not been approved for adoption in the Russian Federation).

• Disclosure Initiative - Amendments to IAS 7 (issued in January 2016 and effective for annual periods beginning on or after 1 January 2017; these amendments have not been approved for adoption in the Russian Federation).

Unless otherwise described above, the new standards and interpretations are not expected to affect significantly the Group's consolidated financial statements.

#### Note 4. Principal subsidiaries

All principal subsidiaries are incorporated and operate in the Russian Federation. Differences between the ownership interest and voting interest held by some subsidiaries represent the effect of preference shares and / or effects of indirect ownership, or non-corporate partnership (LLC).

The Group operates in the three main reportable segments one of which is presented by the Group's parent company – PJSC RusHydro (Note 5). The principal subsidiaries are presented below according to their allocation to the reportable segments as at 31 December 2015 and 31 December 2014.

#### ESC RusHydro subgroup segment

ESC RusHydro subgroup segment includes the Group's subsidiaries which sell electricity to final customers. All the entities included in this segment with the exception of JSC ESC RusHydro have the guaranteeing supplier status and are obliged to sign contracts on supplies with all final consumers of their region upon their request.

	31 Decem	31 December 2014		
	% of ownership	% of voting	% of ownership	% of voting
JSC ESC RusHydro	100.00%	100.00%	100.00%	100.00%
PJSC Krasnoyarskenergosbyt	65.81%	69.40%	65.81%	65.81%
PJSC Ryazan Power Distributing Company	90.52%	90.52%	90.52%	90.52%
JSC Chuvashskaya energy retail company	100.00%	100.00%	100.00%	100.00%
LLC ESC Bashkortostan	100.00%	-	100.00%	-

#### RAO ES East subgroup segment

RAO ES East subgroup segment consists of PJSC RAO ES East and its subsidiaries that generate, distribute and sell electricity and heat in the Far East region of the Russian Federation and render transportation, distribution, construction, repair and other services.

Principal subsidiaries of this segment are presented below:

	31 December 2015			er 2014
	% of ownership	% of voting	% of ownership	% of voting
PJSC RAO ES East*	85.92%	86.20%	85.92%	86.20%
PJSC DEK	44.92%	52.17%	44.92%	52.17%
JSC DGK	44.92%	100.00%	44.92%	100.00%
JSC DRSK	44.92%	100.00%	44.92%	100.00%
PJSC Kamchatskenergo	84.83%	98.74%	84.83%	98.74%
PJSC Magadanenergo**	42.10%	49.00%	42.10%	49.00%
OJSC Sakhalinenergo	49.67%	57.82%	47.72%	55.55%
PJSC Yakutskenergo	72.21%	79.16%	72.21%	79.16%

\* Voting and ownership percent interests in PJSC RAO ES East include 1.80 percent interest held by the Group's subsidiary LLC Vostok-Finance.

\*\* Control over PJSC Magadanenergo is achieved by the majority of votes on the shareholders meeting because the remaining part of the shares not owned by the Group are distributed among a large number of shareholders the individual stakes of which are insignificant.

#### Other segments

Other segments include:

- the Group's subsidiaries with production and sale of electricity and capacity;
- the Group's subsidiaries primarily engaged in research and development related to the utilities industry and construction of hydropower facilities;
- the Group's subsidiaries engaged in repair, upgrade and reconstruction of equipment and hydropower facilities;
- the Group's subsidiaries engaged primarily in hydropower plants construction;
- minor segments which do not have similar economic characteristics.

Principal subsidiaries included in all other segments are presented below:

		31 Decem	31 December 2015		oer 2014
		% of ownership	% of voting	% of ownership	% of voting
JSC	Blagoveschensk HPP	100.00%	100.00%	100.00%	100.00%

(Decrease) / increase in cash and cash equivalents	(2,149)	4,263	(1,005)	(89)

The rights of the non-controlling shareholders of the presented subgroups are determined by the Federal Law "On Joint Stock Companies" and the charter documents of PJSC RAO ES East and PJSC DEK.

#### Note 5. Segment information

Operating segments are components of the Group engaged in operations from which they may earn revenue and incur expenses, including revenue and expenses relating to transactions with other components of the Group. The individual financial information of the operating segments, which based on the same principles as the present consolidated financial statements, is available and is regularly reviewed by the chief operating decision maker (CODM) to make operating decisions about resources to be allocated and the performance of segments' operating activities.

The CODM analyses the information concerning the Group by the groups of operations which are aggregated in operating segments presented by the following separate reportable segments: PJSC RusHydro (the Group's parent company), ESC RusHydro subgroup, RAO ES East subgroup and other segments (Note 4). Transactions of other segments are not disclosed as reportable segments as the performance is based on quantitative indicators for the periods presented.

Management of operating activities of segments is performed with direct participation of individual segment managers accountable to the CODM. Segment managers on a regular basis submit for approval to the CODM results of operating activities and financial performance of segments. The CODM approves the annual business plan at the level of reportable segments as well as analyses actual financial performance of segments. Management bears responsibility for execution of approved plan and management of operating activities at the level of segments.

(in millions of Russian Rubles unless noted otherwise)

The segments' operational results are estimated on the basis of EBITDA, which is calculated as operating profit / loss excluding insurance indemnity, depreciation of property, plant and equipment and intangible assets, impairment of property, plant and equipment, impairment of other non-current assets, impairment of goodwill, impairment of available-for-sale financial assets, accounts receivable, long-term promissory notes, loss on disposal of property, plant and equipment, loss on remeasurement of net assets of subsidiary asquired exclusively with a view for resale, curtailment in pension payment and pension plan and other non-monetary items of operating expenses. This method of definition of EBITDA may differ from the methods applied by other companies. CODM believes that EBITDA represents the most useful means of assessing the performance of ongoing operating activities of the Company and the Group's subsidiaries, as it reflects the earnings trends without showing the impact of certain charges.

Segment information also contains capital expenditures and the amount of debt as these indicators are analysed by the CODM. Intersegment debt's balances are excluded.

Other information provided to the CODM complies with the information presented in the consolidated financial statements.

Intersegment sales are carried out at market prices.

Segment information for the years ended 31 December 2015 and 31 December 2014 and as at 31 December 2015 and 31 December 2014 is presented below:

Year ended 31 December 2015	PJSC RusHydro	ESC RusHydro subgroup	RAO ES East subgroup	Other segments	Total segments	Unallocated adjustments and intercompany operations	TOTAL

#### Note 6. Related party transactions

Parties are generally considered to be related if the parties are under common control or if one party has the ability to control the other party or can exercise significant influence or joint control over the other party in making financial and operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

The Group's principal related parties for the years ended 31 December 2015 and 31 December 2014 were joint ventures, associates of the Group (Note 8) and government-related entities.

#### Joint ventures

The Group had the following balances with its joint ventures:

	Note	31 December 2015	31 December 2014
Promissory notes	10	5,711	5,203
Loans issued		2,725	1,492
Loans received		750	-

The Group had the following transactions with its joint ventures:

	Year ended	Year ended
	31 December 2015	31 December 2014
Sales of electricity and capacity	851	146
Other revenue	778	569
Purchased electricity and capacity	2,149	1,049

#### Associates

The Group had the following balances with its associates:

	Year ended	Year ended
	31 December 2015	31 December 2014
Trade and other receivables	440	293
Accounts payable	481	352

The Group had the following transactions with its associates:

	Year ended 31 December 2015	Year ended 31 December 2014
Sales of electricity and capacity	2,351	2,671
Other revenue	258	150
Construction services	447	285
Purchased electricity and capacity	19	161

#### Government-related entities

In the normal course of business the Group enters into transactions with the entities controlled by the Government.

The Group had transactions during the years ended 31 December 2015 and 31 December 2014 and balances outstanding as at 31 December 2015 and 31 December 2014 with the following government-related banks: SC Vnesheconombank, PJSC Sberbank, Bank GPB (JSC), PJSC VTB Bank, PJSC VTB24, OJSC Bank of Moscow, JSC Rosselkhozbank (Notes 11, 14, 18). All transactions are carried out on market rates.

The Group's sales of electricity, capacity and heat to government-related entities comprised approximately 30 percent of total sales of electricity, capacity and heat for the year ended 31 December 2015 (for the year ended 31 December 2014: approximately 30 percent). Sales of electricity and capacity under the regulated contracts are conducted directly to the consumers, within the day-ahead market (DAM) – through commission agreements with JSC Centre of Financial Settlements (CFS). Electricity and capacity supply tariffs under the regulated contracts and electricity and heating supply tariffs in non-pricing zone of the Far East are approved by FTS and by regional regulatory authorities of the Russian Federation. On DAM the price is determined by balancing the demand and supply and such price is applied to all market participants. During the period the Group received government subsidies in amount of RR 14,314 million (in 2014 in the amount of RR 12,428 million) (Note 23).

The Group's purchases of electricity, capacity and fuel from government-related entities comprised approximately 20 percent of total expenses on purchased electricity, capacity and fuel for the year ended 31 December 2015 (for the year ended 31 December 2014: approximately 25 percent).

Electricity distribution services provided to the Group by government-related entities comprised approximately 50 percent of total electricity distribution expenses for the year ended 31 December 2015 (for the year ended 31 December 2014: approximately 60 percent). The distribution of electricity is subject to tariff regulations.

*Key management of the Group.* Key management of the Group includes members of the Board of Directors of the Company, members of the Management Board of the Company, heads of the business subdivisions of the Company and their deputies, key management of subsidiaries of RAO ES East subgroup segment.

Remuneration to the members of the Board of Directors of the Company for their services in their capacity and for attending Board meetings is paid depending on the results for the year and is calculated based on specific remuneration policy approved by the Annual General Shareholders Meeting of the Company.

Remuneration to the members of the Management Board and to other key management of the Group is paid for their services in full time management positions and is made up of a contractual salary and performance bonuses depending on the results of the work for the period based on key performance indicators approved by the Board of Directors of the Company.

Main compensation for Key management of the Group generally is short-term excluding future payments under pension plans with defined benefits. Pension benefits for key management of the Group are provided on the same terms as for the rest of employees.

Short-term remuneration paid to the key management of the Group for the year ended 31 December 2015 comprised RR 2,174 million (for the year ended 31 December 2014: RR 2,365 million).

As at 31 December 2015 included in the net book value of the property, plant and equipment are office buildings and plots of land owned by the Group in the amount of RR 7,793 million (31 December 2014: RR 7,869 million) which are stated at cost.

Assets under construction represent the expenditures for property, plant and equipment that are being

constructed, including hydropower plants under construction, and advances to construction companies and suppliers of property, plant and equipment. As at 31 December 2015 such advances amounted to RR 59,531 million (31 December 2014: RR 51,785 million).

Additions to assets under construction included capitalised borrowing costs in the amount of RR 14,706 million, the capitalisation rate was 11.28 percent (for the year ended 31 December 2014: RR 9,347 million, the capitalisation rate was 8.77 percent).

Additions to assets under construction included capitalised depreciation in the amount of RR 1,088 million (for the year ended 31 December 2014: RR 149 million).

Other property, plant and equipment include motor vehicles, land, office fixtures and other equipment.

Management of the Group considers that the carrying amount of property, plant and equipment as at 31 December 2015 and 31 December 2014 does not differ materially from their fair value at the end of the reporting period.

#### Process of fair value of property, plant and equipment assessement

Management of the Group determines the fair value of property, plant and equipment according to the following procedures.

The Group's property, plant and equipment are mainly represented by specialised property: the Group's key assets are represented by unique hydro engineering structures and power equipment manufactured under certain technical specifications for each power plant; such equipment is rarely sold in the market.

The Group's management determines the value of the specialised property on a regular basis, using the cost approach. The cost approach is based on the economic concept which implies that a buyer will pay no more for an asset than it would cost to develop or obtain another asset with the same functionality. The total costs of replacement or reproduction of the analysed asset resulting from such measurement are decreased by the amount of physical, functional and economic depreciation.

The replacement costs are determined based on specialised reference books, regulatory documents, construction rates, manufacturer's prices in effect as of the valuation date; physical and functional depreciation is measured based on the age of the assets, their actual condition and operating mode, etc.

To determine the economic depreciation of specialised assets, the Group's management calculates the recoverable amount using the income approach. It is based on discounted cash flow method, and the Group uses certain assumptions when building the cash flow forecast. In particular, these assumptions are used to determine the expected cash flows, capital expenditures and discount rates for each cash generating unit. The Group's management determines the forecast horizon, and net cash inflows from the asset's operation are calculated for each period of this horizon. The recoverable amount of the cash generating unit is determined by recalculating the discounted net cash flows. The Group's management believes that the Group subsidiaries and Company's branches are separate cash generating units.

When the recoverable amount of the cash generating unit is higher than the replacement cost less physical and functional depreciation of property, plant and equipment included in this cash generating unit, it is concluded that there is no economic depreciation. If this is not the case and if the recoverable amount is less than the carrying amount of cash generating unit, the economic impairment is determined as the difference between the recoverable amount and the carrying amount.

# Impairment of property, plant and equipment as at 31 December 2015 and 31 December 2014

The following key assumptions were used when the cash flow testing was performed for the years ended 31 December 2015 and 31 December 2014:

Key assumptions used in the cash flow testing	Year ended 31 December 2015	Year ended 31 December 2014
Information used	Actual operating results for 2015 and business plans for 2016–2021	Actual operating results for 2014 and business plans for 2015–2020
Forecast period*	For existing plants 10 years (2016–2025)	For existing plants 10 years (2015–2024)
	For plants under construction - 20 years after commissioning and before the completion of capacity sale contracts (2016–2039)	
	For cash-generating units of the Far East - 11-25 years (2016–2041)	For cash-generating units of the Far East - 11-25 years (2015–2040)
Forecasted growth rates in terminal period	4.0 percent	4.0–4.1 percent, depending on the length of the forecast period
Discount rate before tax (based on weighted average cost of capital)	14.97–16.8 percent (RR)	14.4-17.8 percent (RR)
Forecast of electricity and capacity tariffs in the isolated energy systems and in non-pricing zone of the Far East	Based on methodology of tariffs calcula	tion adopted by regulatory authority
Forecast of electricity and capacity prices in competitive market	Based on the forecast of JSC TSA and forecast of JSC TSA and forecast of JSC TSA and forecast of the ministry of Eco	
Forecast of capacity prices related to competitive capacity selection	For 2016–2019 – based on the results of competitive capacity selection, except for stations, where regulated tariffs are used	For 2015 – based on the results of competitive capacity selection, except for stations, where regulated tariffs are used
	For 2017 and after – adjusted on consumer index price and forecasts of JSC TSA	For 2016 and after – adjusted on consumer index price and forecasts of JSC TSA
Forecast of electricity and capacity volumes	Based on the Company's management ass	essment of future trends in the business
Forecast of capital expenditures		ment valuation of capital expenditures on ernisation and reconstruction programme

\* Management considers that a forecast period greater than five years is appropriate as the wholesale electricity and capacity market is expected to change significantly over the forecast period and cash flow projections will not be stabilised within five years. However a forecast period of cash flows was mainly defined by remaining useful life of assets tested. For hydroelectric power plants this period may amount up to 100 years due to the fact that key asset is a dam. In this regard the recoverable amount of assets was defined based on cash flows during the forecast period and terminal values.

The values assigned to the key assumptions represent management's assessment of future trends in the business and are based on both external and internal sources.

Loss was recognized mainly in respect of receipt of fixed assets as a cash-generating unit means impaired in prior periods. As a result, impairment loss in the amount of RR 12,593 million was recognised in Consolidated Income Statement and decrease of previous revaluation reserve in the amount of RR 1,242 million (before income tax of RR 248 million) – in other comprehensive loss.

As a result of property, plant and equipment impairment as at 31 December 2015 its net book value decreased for the total amount of RR 13,835 million, the effects relate mainly to the following cash-generating units:

- Kabardino-Balkarian branch impairment loss in the amount of RR 2,420 million and decrease of
  previous revaluation reserve in the amount of RR 1,216 million;
- Karachaevo-Cherkessia branch impairment loss in the amount of RR 2,833 million and decrease of
  previous revaluation reserve in the amount of RR 6 million;
- Bureiskaya HPP impairment loss in the amount of RR 2,541 million and decrease of previous revaluation reserve in the amount of RR 20 million;

- Cascade of Kubanskiye HPPs impairment loss in the amount of RR 704 million and decrease of
  previous revaluation reserve in the amount of RR nil million;
- Zeiskaya HPP impairment loss in the amount of RR 680 million and decrease of previous revaluation reserve in the amount of RR nil million;
- Zagorskaya GAES impairment loss in the amount of RR 415 million and decrease of previous revaluation reserve in the amount of RR nil million.

The sensitivity analysis of the recoverable amounts of cash-generating units for the key assumptions is presened in Note 31.

As a result of property, plant and equipment impairment as at 31 December 2014 its net book value decreased for the total amount of RR 16,737 million. As a result, impairment loss in the amount of RR 8,991 million was recognised in Consolidated Income Statement and decrease of previous revaluation reserve in the amount of RR 7,746 million (before income tax of RR 1,549 million) – in other comprehensive loss.

The carrying amount of each class of of property, plant and equipment that would have been recognised had the assets been carried under the cost model is as follows:

	Production buildings	Facilities	Plant and equipment	Assets under construction	Other	Total
Net book value as at 31 December 2015	29,793	111,249	152,336	260,080	1,492	554,950
Net book value as at 31 December 2014	28,409	103,047	124,524	231,039	1,914	488,933

**Events on Zagorskaya GAES-2.** On 17 September 2013 there was a partial flooding at Zagorskaya GAES-2 which is under construction in the Moscow Region. The flooding of the GAES building originated from the lower reservoir via functional joints of the station block and a newly formed cavity in the right junction of the GAES-2 building foundation. Construction and assembly works as well as property, including equipment, were insured by PIJSC Ingosstrakh, JSC AlfaStrakhovanie and JSC SOGAZ. As at 31 December 2015 all insurance companies have recognized the technical incident at Zagorskaya GAES-2 as an insured event.

Other operating income for the year ended 31 December 2015 include insurance indemnity received from JSC AlfaStrakhovanie in the amount of RR 847 million (the maximum insurance amount under the contract with JSC AlfaStrakhovanie is RR 1,200 million) and from JSC SOGAZ in the amount of RR 868 million (the maximum insurance amount under the contract with JSC SOGAZ is RR 2,633 million), as well as insurance indemnity from PIJSC Ingosstrakh in the amount of RR 4,756 million.

For the year ended 31 December 2015 a loss on disposal of damaged equipment and assets under construction which are not recoverable was recognised in Operating expenses in the amount of RR 2,706 million. Also for the year ended 31 December 2015 the Group has carried expenses on recovery works in the total amount of RR 2,243 million which are recognized in the following items of Operating expenses: services of subcontracting companies, other third parties services, other materials, employee benefit expenses, rent expenses.

Currently management of the Group cannot reliably estimate future expenses that may be necessary to eliminate consequences of the technical incident. However, these expenses may be material for the Group.

Management of the Group believes that there are no indications of property, plant and equipment impairment as at 31 December 2015 there were capacity supply contracts concluded in respect of new power generation facilities of Zagorskaya GAES-2, that guarantee the payback period of 20 years for all capital expenses invested in construction in the period.

*Leased equipment.* As at 31 December 2015 the net book value of assets held under finance lease and included in property, plant and equipment was RR 3,107 million (31 December 2014: RR 4,639 million). Assets held under finance lease were mainly represented by plant and equipment.

**Operating lease.** The Group leases a number of land areas owned by local governments and production buildings under non-cancellable operating lease agreements. Land lease payments are determined by lease agreements. The land areas leased by the Group are the territories on which the Group's hydropower plants and other assets are located. According to the Land Code of the Russian Federation such land areas are limited in their alienability and cannot become private property. The Group's operating leases typically run for an initial period of 5–49 years with an option to renew the lease after that date. Lease payments are

reviewed regularly.

The future payments under non-cancellable operating leases in accordance with rates as at the reporting period end are as follows:

	31 December 2015	31 December 2014
Less than one year	2,309	2,174
Between one and five years	3,826	4,169
After five years	38,852	40,028
Total	44,987	46,371

*Pledged assets.* As at 31 December 2015 RR no property, plant and equipment have been pledged as collateral for borrowings (31 December 2014: RR 3 million).

#### Note 8. Investments in associates and joint ventures

The Group's interests in associates and joint ventures and its carrying value were as follows:

	Place of	% held		Carrying	value
	business	31 December 2015 31	December 2014 3	1 December 2015 3	1 December 2014

#### Associates

#### OJSC Irkutsk Electronetwork Company (OJSC IENC)

OJSC IENC maintains 0.4–500 kW electric grids of the Irkutsk region with the total length of over 40,000 km and more than 9,600 transforming substations with total capacity of over 27,900 MVA. The core activities of OJSC IENC are provision of services of electricity transmission via electric grids in the interests of large consumers and utilities companies, i.e. entities operating in the wholesale electricity and capacity market. OJSC IENC is controlled by EN+ Group.

The Group's investments in OJSC IENC represent its strategic assets and allow the Group to use them in the acquisition and asset exchange transactions; in addition, they represent a source of dividends.

OJSC Sakhalin Energy Company (OJSC SEC)

OJSC SEC is the customer-developer of a number of electricity sector assets in the Sakhalin region as part of the federal special purpose program Economic and Social Development of the Far East and Transbaikal until 2014 and the oblast's special purpose program Power Sector Development in the Sakhalin Region until 2010 and for the Long-term Period until 2020. OJSC SEC's major investment project was the Construction of Power Generating Unit No. 4 at Yuzhno-Sakhalinsk Thermal Power Plant-1, which is operated by OJSC Sakhalinenergo, the Group's subsidiary, under a lease agreement. Other OJSC SEC's shareholders, in addition to the Group, are the Russian Government and the government of the Sakhalin region represented by the Ministry of Land and Property Affairs of Sakhalin region

The Group's investments in OJSC SEC represent strategic assets which allow a more efficient joint operation of the assets of OJSC Sakhalinenergo and OJSC SEC.

#### PJSC Krasnoyarskaya HPP

In July 2014 25 percent minus 1 share of PJSC Krasnoyarskaya HPP were transfered by the Group's subsidiary JSC HydroInvest to JSC EuroSibEnergo in exchange of 3.39 percent of treasury shares (Note 15). Remaining 0.12 percent of shares of PJSC Krasnoyarskaya HPP were reclassified to available-for-sale financial assets.

# Joint ventures

# BoGES Group and BALP Group

Starting from 2006 the Company and RUSAL Group have been jointly implementing the BEMA project based on an agreement for mutual financing, completion and subsequent operation of Boguchanskaya HPP and Boguchansky aluminium plant. Within the BEMA project on parity basis joint ventures BoGES Ltd (Cyprus) and BALP Ltd (Cyprus) were formed, which have controlling interests in OJSC Boguchanskaya HPP and CJSC Boguchansky Aluminium Plant.

BoGES Ltd and OJSC Boguchanskaya GES together form BoGES Group. BALP Ltd and CJSC Boguchansky Aluminium Plant together form BALP Group.

BoGES Ltd and BALP Ltd provide corporate governance of Boguchanskaya HPP and Boguchansky Aluminium Plant in line with the parity of interests of the investors and are not engaged in other operations.

Starting from November 2012 Boguchanskaya HPP sells electricity and capacity to large consumers and utilities companies. An installed capacity of Boguchanskaya HPP is 2,997 MW, long-term average project production – 17 600 million kWh.

The construction of 1-st series of Boguchansky Aluminium Plant is ongoing. Project capacity of Boguchansky Aluminium Plant is 600 thousand tonnes of aluminium per annum. Manufacturing plant complex consists of two series of capacity 296 thousand tonnes each. Boguchansky Aluminium Plant will become a key consumer of energy generated by Boguchanskaya HPP.

Summarised financial information for significant joint ventures for the years ended 31 December 2015 and 31 December 2014 and as at 31 December 2015 and 31 December 2014:

The Group has issued guarantees for OJSC Boguchanskaya HPP for the loan facility in favour of the State Corporation Vnesheconombank (Note 28).

# Note 9. Available-for-sale financial assets

	31 Decemb	er 2015	31 December 2014	
	% of ownership	Fair value	% of ownership	Fair value
PJSC Inter RAO	4,92%	5,606	4,92%	3,654
PJSC Russian Grids	0,28%	228	0,28%	212
PJSC FGC UES	0,13%	99	0,13%	76
Other	-	161	-	190
Total available-for-sale financial assets		6,094		4,132

The fair values of available-for-sale financial assets were calculated based on quoted market prices, for those which are not publicly traded fair values were estimated by reference to the discounted cash flows of the investees (Note 31).

Profit arising on available-for-sale financial assets for the year ended 31 December 2015 totaled RR 1,962 million, including revaluation of PJSC Inter RAO – RR 1,953 million, was recorded within other comprehensive income (for the year ended 31 December 2014 loss totaled RR 2,436 million and was recorded within other comprehensive income in amount of RR 42 million net of tax and in profit or loss in amount of RR 2,478 million).

#### Note 10. Other non-current assets

	31 December 2015	31 December 2014
Long-term promissory notes	38,189	37,047
Discount	(16,946)	(16,864)
Impairment provision	(14,025)	(14,025)
Long-term promissory notes, net	7,218	6,158
VAT recoverable	2,546	3,226
Dams of Bratskaya, Ust'-Ilimskaya and Irkutskaya HPPs	2,164	5,478
Customer base of LLC ESC Bashkortostan	553	1,109
Goodwill	481	929
Other non-current assets	8,440	8,121
Total other non-current assets	21,402	25,021

	Rating*	Rating agency	Effective interest rate	Maturity date	31 December 2015	31 December 2014
Long-term promissory notes						
OJSC Boguchanskaya HPP	-	- Fitch	9.75%	2029	5,711	5,203
PJSC ROSBANK	BBB-	Ratings	10.90–14.58%	2020–2022	784	446
JSC Alfa Bank	Ba2	Moody's	11.90–16.35%	2016–2022	673	466
Other					50	43
Total long-term promissory	notes				7,218	6,158

*Promissory notes of OJSC Boguchanskaya HPP.* As at 31 December 2015 the amortised cost of interestfree long-term promissory notes of OJSC Boguchanskaya HPP (payable not earlier than 31 December 2029 with total nominal value of RR 21,027 million) pledged as collateral to the State Corporation Vnesheconombank amounted to RR 5,711 million (31 December 2014: RR 5,203 million) (Note 8).

**Dams of Bratskaya, Ust'-Ilimskaya and Irkutskaya HPPs.** The recoverable amount of dams of Bratskaya, Ust'-Ilimskaya and Irkutskaya HPPs owned by the Group received in 2011 in the course of additional share issue of the Company is estimated by management based on future cash flows. Key assumption used for the cash flows analysis is estimation of the annual consideration, received from PJSC Irkutskenergo and respective to market value of right of temporary ownership and use this property. Due to the deterioration of estimation of the annual consideration as at 31 December 2015 the Group recognised impairment of dams of Bratskaya, Ust'-Ilimskaya and Irkutskaya HPPs in the amount of RR 3,220 million.

Goodwill and customer base. Presented below is the carrying value of goodwill:

	Year ended	Year ended
	31 December 2015	31 December 2014
Carrying amount as of 1 January	929	929
Impairment loss	(448)	-
Carrying amount as of 31 December	481	929

*Goodwill of JSC Institute Hydroproject.* Goodwill of RR 929 million was recognised at the date of the acquisition of JSC Institute Hydroproject in October 2010 as the Group was able to receive economic benefits from the expected synergy from the high qualification of engineering specialists and long-term relationships between JSC Institute Hydroproject and customers, including the Group entities.

As at 31 December 2015 and 31 December 2014, the Group tested goodwill related to JSC Institute Hydroproject for its potential impairment. For the testing purposes, JSC Institute Hydroproject was considered as a single cash generating asset.

Presented below are key assumptions used for the impairment testing purposes for the years ended 31 December 2015 and 31 December 2014:

Key assumptions used for the impairment testing purposes	For the year ended 31 December 2015	For the year ended 31 December 2014
Information used	Actual performance for 2015 and results of business plans for 2016-2020	Actual performance for 2014 and results of business plans for 2015-2019
Forecast period	5 years	5 years
Growth interest rate after the forecast period	4.0 percent	4.3 percent
Discount rate	15.6 percent	16.1 percent
Net cash inflow after the forecast period	Minimum expectation: RR 148 million in 2016,	Minimum expectation: RR 167 million in 2015,
	RR 67 million in 2017,	RR 175 million in 2016,
	RR 94 million in 2018,	RR 182 million in 2017,
	RR 110 million in 2019,	RR 193 million in 2018,
	RR 122 million in 2020	RR 201 million in 2019
Net cash inflow after the forecast period	Minimum expectation: RR 114 million per year	Minimum expectation: RR 178 million per year

Based on the above assumptions, as at 31 December 2015 recoverable amount of JSC Institute Hydroproject as a cash generating asset was less than the carrying amount and the Group recognised impairment if goodwill in the amount of RR 448 million. As at 31 December 2014 there was no economic impairment.

*Customer base of LLC ESC Baskortostan.* As at 31 December 2015 and 31 December 2014 the Group tested customer base of LLC ESC Baskortostan for potential impairment. For the testing purposes LLC ESC Baskortostan was considered as a single cash generating unit.

#### Presented below are key assumptions used for the impairment testing purposes:

Key assumptions used for the impairment testing purposes		-
Information used	Actual performance for 2015 and results of business plans for 2016-2020	Actual performance for 2014 and results of business plans for 2015-2019
Forecast period*	10 years (2016-2025)	10 years (2015-2024)
Growth interest rate after the forecast period	3.8 percent	4.0 percent
Discount rate	15.3 percent	15.2 percent
Forecast electricity sales	Based on manag	ement forecast
Forecast electricity tariffs	2016 – based on tariffs set by regulators 2017-2025 – based on the consumer price index	2015 – based on tariffs set by regulators 2016-2024 – based on the consumer price index

\* The management believes that the forecast period exceeding five years is more reliable as the electricity and capacity market is expected to undergo significant changes during the forecast period, and cash flows will not flatten out within five years.

As at 31 December 2015 and 31 December 2014 the recoverable amount of LLC ESC Baskortostan exceeded the carrying amount – no loss on impairment related to the customer base of LLC ESC Baskortostan was recognised.

#### Note 11. Cash and cash equivalents

	31 December 2015	31 December 2014
Cash at bank	11,857	14,960
Cash equivalents (contractual interest rate: 3.76-16.40%)	36,137	19,417
Cash in hand	31	17
Total cash and cash equivalents	48,025	34,394

Cash equivalents held as at 31 December 2015 and 31 December 2014 comprised short-term bank deposits with original maturities of three months or less.

Cash and cash equivalents balances denominated in US Dollars as at 31 December 2015 were RR 2,801 million (31 December 2014: RR 767 million). Cash and cash equivalents balances denominated in Euros as at 31 December 2015 were RR 61 million (31 December 2014: RR 2,310 million).

Cash and cash equivalents are deposited in several institutions as follows:

# Note 12. Accounts receivable and prepayments

	31 December 2015	31 December 2014
Trade receivables	55,075	50,931
Provision for impairment of trade receivables	(20,158)	(18,643)
Trade receivables, net	34,917	32,288
VAT recoverable	8,156	8,683
Advances to suppliers and other prepayments Provision for impairment of advances to suppliers and other	3,540	3,957
prepayments	(1,021)	(670)
Advances to suppliers and other prepayments, net	2,519	3,287
Other receivables	7,248	6,637
Provision for impairment of other receivables	(3,194)	(2,883)
Other receivables, net	4,054	3,754
Total accounts receivable and prepayments	49,646	48,012

The provision for impairment of accounts receivable has been determined based on specific customer identification, customer payment trends, subsequent receipts and settlements and the analysis of expected future cash flows (Note 2). The Group believes that the Group's subsidiaries will be able to realise the net receivable amount through direct collections and other non-cash settlements, and the carrying value approximates their fair value.

Movements in the impairment provision for accounts receivables and prepayments are as follows:

	Year ended 31 December 2015	Year ended 31 December 2014
As at 1 January	21,526	17,779
Charge for the year	6,650	8,534
Reversal of impairment	(3,808)	(3,230)
Trade receivables written-off as uncollectible	(1,016)	(1,557)
As at 31 December	23,352	21,526

The ageing analysis of trade and other finance accounts receivable is as follows:

	31 December 2015	Provision as at 31 December 2015	31 December 2014	Provision as at 31 December 2014
Not past due	29,622	(2,426)	26,143	(967)
Past due for less than 3 months	6,655	(1,260)	6,229	(953)
Past due for 3 months to 1 year	7,499	(2,834)	8,139	(3,838)
Past due for more than 1 year	17,959	(16,832)	16,127	(15,768)
Total	61,735	(23,352)	56,638	(21,526)

The majority of trade debtors which are neither past due nor impaired could be aggregated in several groups based on similarities in their credit quality: large industrial consumers – participants of the wholesale and retail electricity and capacity market as well as public sector entities and population.

The Group does not hold any accounts receivable pledged as collateral.

#### Note 13. Inventories

31 December 2015	31 December 2014

#### Note 15. Equity

#### Number of issued and fully paid

ordinary shares (Par value of RR 1.00)

As at 31 December 2015	386,255,464,890
As at 31 December 2014	386,255,464,890
As at 31 December 2013	386,255,464,890

*Treasury shares.* As at 31 December 2015 treasury shares were represented by 21,786,611,933 ordinary shares in the amount of RR 26,092 million (31 December 2014: 21,786,611,933 ordinary shares in the amount of RR 26,092 million).

In July 2014 3.39 percent of treasury shares were received by the Group's subsidiary JSC HydroInvest from JSC EuroSibEnergo in exchange of 25 percent minus 1 share of PJSC Krasnoyarskaya HPP.

Treasury shares carry voting rights in the same proportion as other ordinary shares. Voting rights of ordinary shares of the Company held by entities within the Group are effectively controlled by management of the Group.

*Effect of changes in non-controlling interest of subsidiaries.* In March 2015 the Group's share in subsidiaries OJSC Daltehenergo and OJSC Guberovskiy machinery and repair plant was sold. In October 2015 share in JSC Kamchatskenergoremont was sold. During the year ended 31 December 2015 LLC Energokomfort Amur electricity wholesale company and JSC Amyrskaya Zhemchuzhina went bankrupt, also in June 2015 OJSC Kamchatskenergoremservis was liquidated. As a result non-controlling interest increased by RR 141 million due to decrease of share in losses of these subsidiaries previously absorbed by shareholders of the Group.

As a result of increasing of share in OJSC Sakhalinenergo from 55,55 percent to 57,82 percent noncontroling interest was reduced by RR 12 million.

*Dividends.* On 26 June 2015 the Company declared dividends for the year ended 31 December 2014 of RR 0.0156 per share in the total amount of RR 6,033 million (RR 5,710 million excluding dividends to subsidiaries).

On 27 June 2014 the Company declared dividends for the year ended 31 December 2013 of RR 0.0136 per share in the total amount of RR 5,248 million (RR 5,130 million excluding dividends to subsidiaries).

Declared dividends of the Group's subsidiaries in favour of non-controlling interest holders amounted to RR 102 million for the year ended 31 December 2015 (for the year ended 31 December 2014: RR 80 million).

*Offer for shares of PJSC RAO ES East.* On 3 November 2015 in accordance with decision of the Board of Directors of the Company the subsudary of the Group - LLC Vostok - Finance declared voluntary offer to purchase shares of PJSC RAO ES East. According to the voluntary offer the shareholders of PJSC RAO

ES East may choose between the sales of ordinary and preferred shares of PJSC RAO ES East owned by them or their exchange for ordinary shares of the Company. Offer for shares of PJSC RAO ES East is a commitment to purchase its own equity instruments for cash or other financial asset, and was recorded as a financial liability in the amount of discounted value of the cash to be paid. Since the offer involves the acquisition of a fixed number of the own equity instruments for a fixed amount of cash, this transaction was accounted for in equity. As at 31 December 2015 the Group recognised the obligation to purchase PJSC RAO ES East shares in the amount of RR 2,108 million (Note 20).

#### Note 16. Income tax

Income tax expense is as follows:

	Year ended	Year ended	
	31 December 2015	31 December 2014	
Current income tax expense	8,881	7,450	
Deferred income tax expense	1,638	610	
Total income tax expense	10,519	8 060	

The income tax rate applicable to the majority of the Group's entities for the year ended 31 December 2015 is 20 percent (for the year ended 31 December 2014: 20 percent).

A reconciliation between the expected and actual income tax expense is provided below:

	Year ended 31 December 2015	Year ended 31 December 2014
Profit before income tax	37,678	32,191
Theoretical tax expense at a statutory rate of 20 percent	(7,536)	(6,438)
Tax effect of items which are not deductible or assessable for taxation purposes	(1,230)	(1,469)
Increase in other unrecognised deferred tax assets	(2,465)	(1,053)
Unrecognised deferred tax assets related to impairment of available-for- sale financial assets (Note 9)	-	(334)
Other	712	1,234
Total income tax expense	(10,519)	(8,060)

The total amount of deductible temporary differences for which deferred income tax assets have not been recognised by the Group as at 31 December 2015 comprised RR 64,285 million (31 December 2014: RR 51,960 million). These temporary differences mainly relate to accumulated impairment of property, plant and equipment, assets under construction and pension liabilities of several Group's subsidiaries.

Deferred income tax. Differences between IFRS and statutory taxation regulations in the Russian Federation give rise to temporary differences between the carrying amount of certain assets and liabilities for financial reporting purposes and their tax bases. The tax effect of the movements in these temporary differences is detailed below and is recorded at the rate of 20 percent (for the year ended 31 December 2014: 20 percent).

#### RusHydro Group Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2015

(in millions of Russian Rubles unless noted otherwise)

Other	(409)	131	(138)	-	(416)
Deferred tax offset	8,277	(212)	-	-	8,065

Under existing Group' structure tax losses and current income tax assets of different Group's entities may not be offset against current income tax liabilities and taxable profits of other Group's entities and, accordingly, taxes may be accrued even where there is a consolidated tax loss. Therefore, deferred income tax assets and liabilities are offset only when they relate to the same taxable entity and the entity has legal rights to offset it.

# Note 17. Pension benefit obligations

The tables below provide information about the benefit obligations and actuarial assumptions used for the years ended 31 December 2015 and 31 December 2014.

Amounts recognised in the Group's Consolidated Statement of Financial Position among other non-current liabilities (Note 19):

	31 December 2015	31 December 2014
Fair value of plan assets	(1,084)	(986)
Present value of defined benefit obligations	9,470	7,874
Net liability	8,386	6,888

The movements in the defined benefit liability for the years ended 31 December 2015 and 31 December 2014 are presented in the tables below:

	Present value of defined benefit obligations	Fair value of plan assets	Total
At 1 January 2015	7,874	(986)	6,888

assumptions	72	-	72
Actuarial gain - change in financial assumptions	(2,190)	-	(2,190)
Actuarial loss - experience adjustments	361	18	379
Recognised other comprehensive income for the			
year ended 31 December 2014 before income tax charge of RR 347 million	(1,757)	18	(1,739)
Employer contributions for funded pension plan	-	(270)	(270)
Benefit payments (Funding NSPF pensions)	(400)	227	(173)
Benefit payments (Non-funded pension plan)	(315)	-	(315)
At 31 December 2014	7,874	(986)	6,888

In December 2015 JSC DGK decided to partially reduce payments to the unemployed pensioners. Also in accordance with the new collective agreement some conditions and the amount of benefits to employees have changed. As a result the Group recognized RR 717 million gain for the year ended 31 December 2015 (RR 501 million for the year ended 31 December 2014) (Note 24).

Principal actuarial assumptions for the Group are as follows:

	31 December 2015	31 December 2014	
Nominal discount rate	9.80%	13.00%	
Inflation rate	6.00%		
Wage growth rate	7.50%	8.50%	
Staff turnover	Staff turnover depending on age base statistics for three y		
Mortality table	Russia-2013*	Russia-2011*	

\* Taking into account the pull down adjustment calculated based on statistical data of mortality for employees of the Group of age till 60 years old for years 2012–2015 (31 December 2014: 2012–2013)

The sensitivity of the defined benefit obligation to changes in the principal actuarial assumptions as at 31 December 2015 is presented below:

	Change in assumption	Effect on net liability	Effect on net liability, %
Nominal discount rate	+ 1%	(726)	-8%
Nominal discount rate	- 1%	852	9%
Inflation rate	+ 1%	548	6%
Initiation rate	- 1%	(469)	-5%
Wago growth rate	+ 1%	327	3%
Wage growth rate	- 1%	(287)	-3%
Staff turnover	+ 3%	(940)	-10%
Stall turnover	- 3%	1,375	15%
Mortality Patas	+ 10%	(134)	-1%
Mortality Rates	- 10%	145	2%

The Group expects to contribute RR 613 million to the defined benefit plans in 2015.

The weighted average duration of the defined benefit obligation of the Group is 9 years.

**Retirement benefit plan parameters and related risks.** The Group has liabilities under retirement benefit plans in Russia. The retirement benefit plan includes benefits of the following types: lump sum payment upon retirement, jubilee benefits paid at certain age or upon completion of a certain number of years of service, financial aid and compensation to cover funeral expenses in the event of an employee's or pensioner's death, financial aid provided to pensioners, pension benefits paid to former employees through the non-state pension fund (hereinafter referred to as the "NPF").

The amount of benefits depends on the period of the employees' service (years of service), salary level over the recent years preceding retirement, predetermined fixed amount or minimum tariff rate of remuneration or salary or a combination of these factors.

As a rule, the above benefits are indexed according to the inflation rate and salary growth for benefits that depend on the salary level, excluding the retirement benefits paid through NPF, which are not indexed for the inflation rate at the time the payment is made (following the retirement of employees, all risks are borne by NPF).

In addition to the inflation risk, all retirement benefit plans of the Group are exposed to mortality and survival risks.

Plan assets held on NPF's accounts are governed in accordance with the local legislation and regulatory practices.

The Group and NPF are severally liable for plans management, including investments decisions and the contribution schedule.

NPF invests the Group's funds in a diversified portfolio. When investing pension savings and placing the pension reserves, NPF is guided by the Russian legislation that provides a strict regulation with respect to the possible list of financial instruments and restricts their utilisation, which also leads to diversification and reduces investment risks.

The Group transfers the obligation to pay lifelong non-state pension benefits to the Group's former employees to NPF and funds these obligations when awarding the pension. Therefore, the Group insures the risks related to payment of non-state pensions (investment risks and survival risks).

#### Note 18. Current and non-current debt

#### Note 22. Revenue

	Year ended 31 December 2015	Year ended 31 December 2014
Sales of electricity	254,518	239,543
Sales of heat and hot water	35,381	34,059
Sales of capacity	33,038	28,012
Other revenue	24,575	27,946
Total revenue	347,512	329,560

Other revenue includes revenue earned from transportation of electricity and heat, connections to the grid, rendering of construction, repairs and other services.

# Note 23. Government grants

In accordance with legislation of the Russian Federation several companies of the Group are entitled to government subsidies for compensation of the difference between approved economically viable electricity and heat tariffs and actual reduced tariffs and for compensation of losses on purchased fuel. During the year ended 31 December 2015 the Group received government subsidies in the amount of RR 14,314 million (for the year ended 31 December 2014: RR 12,428 million) in the following subsidised territories: Kamchatsky territory, the Sakha Republic (Yakutia), Magadan Region and other Far East regions.

# Note 24. Operating expenses (excluding impairment losses)

	Year ended 31 December 2015	Year ended 31 December 2014
Employee benefit expenses (including payroll taxes	72,871	65,504
and pension benefit expenses) Purchased electricity and capacity	60,805	57,504

Other expenses	1,212	2,070
Total operating expenses (excluding impairment losses)	315,103	290,838

#### Note 25. Finance income, costs

	Year ended 31 December 2015	Year ended 31 December 2014
Finance income		
Interest income	9,620	7,407
Foreign exchange gain	2,316	1,404
Gain on derivative financial instruments	162	309
Income on discounting	132	109
Other income	83	90
Total finance income	12,313	9,319
Finance costs		
Interest expense	(5,762)	(4,879)
Foreign exchange loss	(1,744)	(3,218)
Expense on discounting	(885)	(1,438)
Finance lease expense	(241)	(115)
Loss on derivative financial instruments	(202)	-
Other costs	(910)	(1,018)
Total finance costs	(9,744)	(10,668)

# Note 26. Earnings per share

	Year ended 31 December 2015	Year ended 31 December 2014
Weighted average number of ordinary shares issued (thousands of shares)	364,468,853	371,494,140
Profit for the period attributable to the shareholders of PJSC RusHydro	31,539	25,606
Earnings per share attributable to the shareholders of PJSC RusHydro – basic and diluted (in Russian Rubles per share)	0.0865	0.0689

#### Note 27. Capital commitments

*Capital commitments.* In accordance with investment programme of the Company and separate investment programmes of subsidiaries, the Group has to invest RR 325,764 million for the period 2016-2018 for reconstruction of the existing and construction of new power plants (RR 341,208 million for the period 2015-2017). Currently there are plans on revision of investment programs of the Company and subsidiaries of the Group.

Capital commitments of the Group as at 31 December 2015 are as follows: 2016 year – RR 138,444 million, 2017 year – RR 111,909 million, 2018 year – RR 75,411 million.

Future capital expenditures are mainly related to reconstruction of equipment of power plants: Saratovskaya HPP in the amount of RR 21,228 million, Volzhskaya HPP in the amount of RR 19,108 million, Zhigulevskaya HPP in the amount of RR 12,720 million; and to construction of power plants: Sakhalin GRES-2 in the amount of RR 25,068 million, Zaramagskie HPP in the amount of RR 23,761 million, Ust'-Srednekanskaya HPP in the amount of RR 14,489 million, Nizhne-Bureiskaya HPP in the amount of RR 10,282 million, HPP in Sovetskaya Gavan in the amount of RR 9,838 million, Yakutskaya GRES-2 in the amount of RR 9,231 million.

#### Note 28. Contingencies

**Social commitments.** The Group contributes to the maintenance and upkeep of the local infrastructure and the welfare of its employees, including contributions toward the development and maintenance of housing, hospitals, transport services, recreation and other social needs in the geographical areas in which it operates.

*Insurance.* The Group holds limited insurance policies in relation to its assets, operations, public liability or other insurable risks. Accordingly, the Group is exposed for those risks for which it does not have insurance.

*Legal proceedings.* The Group's subsidiaries are parties to certain legal proceedings arising in the ordinary course of business. In the opinion of management, there are no current legal proceedings or other claims outstanding, which, upon final disposition, will have a material adverse effect on the position of the Group.

*Tax contingencies.* Russian tax legislation which was enacted or substantively enacted at the end of the reporting period, is subject to varying interpretations when being applied to the transactions and activities of the Group. Consequently, tax positions taken by management and the formal documentation supporting the tax positions may be challenged by tax authorities, in particular, the way of accounting for tax purposes of some income and expenses of the Group as well as deductibility of input VAT from suppliers and contractors. Russian tax administration is gradually strengthening, including the fact that there is a higher risk of review of tax transactions without a clear business purpose or with tax incompliant counterparties. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar years preceding the year when decisions about the review was made. Under certain circumstances reviews may cover longer periods.

The Russian transfer pricing legislation is to a large extent aligned with the international transfer pricing principles developed by the Organisation for Economic Cooperation and Development (OECD). This legislation provides the possibility for tax authorities to make transfer pricing adjustments and impose additional tax liabilities in respect of controlled transactions (transactions with related parties and some types of transactions with unrelated parties), provided that the transaction price is not arm's length.

During 2015 the Group's subsidiaries had controlled transactions and transactions which highly probably will be considered by tax authorities to be controlled based on the results of the year 2015. Management has implemented internal controls to be in compliance with the new transfer pricing legislation.

Tax liabilities arising from transactions between companies are determined using actual transaction prices. It is possible, with the evolution of the interpretation of the transfer pricing rules, that such transfer prices could be challenged. The impact of any such challenge cannot be reliably estimated; however, it may be significant to the financial position and/or the overall operations of the Group.

Management believes that as at 31 December 2015 its interpretation of the relevant legislation was appropriate and the Group's tax position would be sustained.

New provisions aimed at deoffshorisation of Russian economy have been added to the Russian tax legislation and are effective from 1 January 2015. Specifically, they introduce new rules for controlled foreign companies, a concept of beneficiary owner of income for the purposes of application of preferential provisions of taxation treaties of the Russian Federation, a concept of tax residency for foreign persons and taxation of indirect sale of Russian real estate assets.

The Group is currently assessing the effects of new tax rules on the Group's operations and takes necessary steps to comply with the new requirements of the Russian tax legislation. However, in view of the recent introduction of the above provisions and insufficient related administrative and court practice, at present the probability of claims from Russian tax authorities and probability of favourable outcome of tax disputes (if they arise) cannot be reliably estimated. Tax disputes (if any) may have an impact on the Group's financial position and results.

**Environmental matters.** The Group's subsidiaries and their predecessor entities have operated in the utilities industry in the Russian Federation for many years. The enforcement of environmental regulation in the Russian Federation is evolving and the enforcement posture of government authorities is continually being reconsidered. The Group's subsidiaries periodically evaluate their obligations under environmental regulations. Group accrued assets retirement obligation for ash damps used by the Group which is included in other non-current liabilities and other accounts payable and comprised RR 683 million as at 31 December 2015 (31 December 2014: RR 653 million).

Potential liabilities might arise as a result of changes in legislation and regulation or civil litigation. The impact of these potential changes cannot be estimated but could be material. In the current enforcement climate under existing legislation, management believes that there are no significant liabilities for environmental damage.

*Guarantees.* The Group has issued guarantees for CJSC Boguchansky Aluminium Plant in favour of its suppliers for future equipment deliveries and for OJSC Boguchanskaya HPP in favour of the State Corporation Vnesheconombank for the loan facility:

Counterparty	31 December 2015	31 December 2014
for OJSC Boguchanskaya HPP:		
State Corporation Vnesheconombank	27,398	28,106
for CJSC Boguchansky Aluminium Plant:		
ALSTOM Grid SAS	77	134
Total guarantees issued	27,475	28,240

# Note 29. Financial risk management

The risk management function within the Group is carried out in respect of financial and operational risks. Financial risk comprise market risk (including currency risk, interest rate risk), credit risk and liquidity risk. The primary objectives of the financial risk management function are to provide reasonable assurance for achievement of the Group's objectives by establishing Group's overall framework, identifying, analyzing and evaluating risks, establishing risk limits, and then ensuring that exposure to risks stays within these limits and in case of exceeding these limits to impact on the risks.

In order to optimise the Group's exposure to risks, the Company constantly works on their identification, assessment and monitoring, as well as the development and implementation of activities which impact on the risks, business continuity management and insurance, seeks to comply with international and national standards of advanced risk management (COSO ERM 2004, ISO 31000 and others), increases the culture of risk management and continuously improves risk management.

*Credit risk.* Credit risk is the risk of financial loss for the Group in the case of non-fulfillment by the Contractor of the obligations on the financial instrument under the proper contract. Exposure to credit risk arises as a result of the Group's sales of products on credit terms and other transactions with counterparties giving rise to financial assets.

The Group's maximum exposure to credit risk by class of assets is reflected in the carrying amounts of financial assets in the Note 32.

Although collection of receivables could be influenced by economic factors, management believes that there is no significant risk of loss to the Group beyond the provision for impairment of receivables already recorded.

There is no independent rating for the Group's customers and therefore the Group considers the credit quality of customers at the contract execution stage. The Group considers their financial position and credit history. The Group monitors the existing receivables on a continuous basis and takes actions regularly to ensure collection or to minimise losses.

To reduce the credit risk in the wholesale electricity and capacity markets the Group has introduced marketing policy and procedure to calculate internal ratings of counterparties in the unregulated market, based on the frequency of default, and to establish limits based on the rating of the customers' portfolio.

The Group's management reviews ageing analysis of outstanding trade receivables and follows up on past due balances. Management therefore considers it appropriate to provide past due accounts receivable and other information about credit risk as disclosed in Note 12.

Cash has been deposited in the financial institutions with no more than minimal exposure to the default risk at the time of account opening. Management of the Group approved the list of banks for deposits, as well as rules for their placement. Moreover, management constantly evaluates the financial condition, ratings assigned by independent agencies, background and other factors of such banks.

The tables in Notes 10, 11 and 14 show deposits with banks and other financial institutions and their ratings at the end of the reporting period.

Credit risk for financial guarantees is defined as the possibility of sustaining a loss as a result of another party to a financial instrument failing to perform in accordance with the terms of the contract. The Group uses the same credit policies in assuming conditional obligations as it does for other financial instruments, through established credit approvals, risk control limits and monitoring procedures.

The Group's maximum exposure to credit risk for financial guarantees was RR 27 475 million as at 31 December 2015 (31 December 2014: RR 28,240 million) (Note 28).

*Market risk.* The Group takes on exposure to market risks. Market risks arise from open positions in (i) foreign currencies, (ii) interest bearing assets and liabilities, all of which are exposed to general and specific market movements. Management sets limits on the value of risk that may be accepted, which is monitored on a regular basis. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

Sensitivities to market risks included below are based on a change in a factor while holding all other factors constant. In practice this is unlikely to occur and changes in some of the factors may be correlated.

*Currency risk.* Electricity and capacity produced by the Group is sold on the domestic market of the Russian Federation at the prices fixed in Russian Rubles. Hence, the Group does not have significant foreign currency exchange risk. The financial condition of the Group, its liquidity, financing sources and the results of operations do not considerably depend on currency rates as the Group operations are planned to be performed in such a way that its assets and liabilities are to be denominated in the national currency.

	31	December 201	5	31 December 2014		
	Monetary financial assets	Monetary financial liabilities	Net balance sheet position	Monetary financial assets	Monetary financial liabilities	Net balance sheet position
USD	6,409	(3,735)	2,674	3,300	(5,464)	(2,164)
EUR	61	(14,335)	(14,274)	2,310	(12,292)	(9,982)
Other	114	-	114	25	-	25
Total	6,584	(18,070)	(11,486)	5,635	(17,756)	(12,121)

The table below summarises the Group's exposure to foreign currency exchange rate risk:

The above analysis includes only monetary assets and liabilities. Equity investments and non-monetary assets are not considered to give rise to any material currency risk.

There is no significant effect of the changes of foreign currency rates on the Group's financial position.

*Interest rate risk.* The Group's operating profits and cash flows from operating activities are not dependent largely on the changes in the market interest rates. Borrowings issued at variable rates (Note 18) expose the Group to cash flow interest rate risk.

The Group obtains debt financing with floating rates, which are established on the basis of the MOSPRIME, Euribor, Libor rates.

As at 31 December 2015, had interest rates at that date been 3 percent higher (31 December 2014: 6 percent higher), with all other variables held constant, profit for the year ended 31 December 2015 and the amount of capital that the Group managed as at 31 December 2015 would have been RR 889 million (31 December 2014: RR 2 093 million) lower, mainly as a result of higher interest expense on variable interest liabilities.

The Group monitors interest rates for its financial instruments. Effective interest rates are disclosed in Note 18.

For the purpose of interest risk reduction the Group makes the following arrangements:

- credit market monitoring to identify favourable credit conditions,
- diversification of credit portfolio by raising of borrowings with fixed rates and floating rates.

*Liquidity risk.* Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

Prudent liquidity risk management includes maintaining sufficient cash and marketable securities and the availability of funding from an adequate amount of committed credit facilities. The Group adheres to the balanced model of financing of working capital – both at the expense of short-term sources and long-term sources. Temporarily free funds are placed into short-term financial instruments, mainly bank deposits and short-term bank promissory notes. Current liabilities are represented mainly by the accounts payable to suppliers and contractors.

The Group has implemented a control system under its contract conclusion process by introducing and applying typical financial arrangements which include standardised payment structure, payment deadlines, percentage ratio between advance and final settlement, etc. In such a manner the Group controls capital maturity.

The table below shows liabilities as at 31 December 2015 by their remaining contractual maturity. The amounts disclosed in the maturity table are the contractual undiscounted cash flows, including gross finance lease obligations (before deducting future finance charges). Such undiscounted cash flows differ from the amount included in the Consolidated Statement of Financial Position because this amount is based on the discounted cash flows.

The maturity analysis of financial liabilities as at 31 December 2015 is as follows:

	2016 year	2017 year	2018 year	2019 year	2020 year	Starting from year 2021
Liabilities		,	,	,	,	
Current and non-current debt	74,633	33,577	65,664	8,313	28,242	38,978
Trade payables (Note 20)	33,475	-	-	-	-	-
Accounts payable under factoring agreements (Note 20)	4,071	-	-	-	-	-
Obligation to PJSC RAO ES East shares purchase (Note 20)	2,108	-	-	-	-	-
Financial guarantees (Note 28)	712	771	1,008	1,269	1,537	22,178
Dividends payable (Note 20)	86	-	-	-	-	-
Finance lease liabilities (Note 18)	706	442	267	203	204	4,546
Net settled derivatives	32	26	17	10	4	-
Total future payments, including principal and interest payments	115,823	34,816	66,956	9,795	29,987	65,702

The maturity analysis of financial liabilities as at 31 December 2014 is as follows:

	2015 year	2016 year	2017 year	2018 year	2019 year	from year 2020
Liabilities						
Current and non-current debt	67,650	30,036	10,676	44,154	12,325	64,984
Trade payables (Note 20)	31,914	-	-	-	-	-
Accounts payable under factoring agreements (Note 20)	1,376	-	-	-	-	-
Financial guarantees (Note 28)	842	636	771	1,008	1,269	23,714
Dividends payable (Note 20)	88	-	-	-	-	-
Finance lease liabilities (Note 18)	979	449	367	192	127	3,169
Net settled derivatives	103	118	65	36	20	7
Total future payments, including principal and interest payments	102,952	31,239	11,879	45,390	13,741	91,874
Liabilities of disposal group	496	-	-	-	-	-

#### Note 30. Management of capital

Compliance with Russian legislation requirements and capital cost reduction are key objectives of the Group's capital risk management.

The following capital requirements have been established for joint stock companies by the legislation of the Russian Federation:

- share capital cannot be lower than 1,000 minimum shares on the date of the company's registration;
- if the share capital of the entity is more than the statutory net assets of the entity, such entity must decrease its share capital to the value not exceeding its net assets;
- if the minimum allowed share capital is more than the statutory net assets of the entity, such entity is subject to liquidation.

As at 31 December 2015 and 31 December 2014 the Company was in compliance with the above share capital requirements.

The Group's objectives in respect of capital management are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. The amount of capital that the Group managed as at 31 December 2015 was RR 613,919 million (31 December 2014: RR 595,151 million).

Consistent with others in the energy industry, the Group monitors the gearing ratio, that is calculated as the total debt divided by the total capital. Debt is calculated as a sum of non-current and current debt, as shown in the Consolidated Statement of Financial Position. Total capital is equal to the total equity, as shown in the

Consolidated Statement of Financial Position. The gearing ratio was 0.32 as at 31 December 2015 (31 December 2014: 0.30).

#### Note 31. Fair value of assets and liabilities

Fair value measurements are analysed by level in the fair value hierarchy as follows: (i) Level 1 are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities, (ii) Level 2 measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices), and (iii) Level 3 measurements are valuations not based on observable market data (that is, unobservable inputs).

#### a) Recurring fair value measurements

Recurring fair value measurements are those that the accounting standards require or permit in the statement of financial position at the end of each reporting period.

The level in the fair value hierarchy into which the recurring fair value measurements are categorised are as follows:

TOHOWS.				
31 December 2015	Level 1	Level 2	Level 3	Total
Financial assets				
Available-for-sale financial assets	6,057	-	37	6,094
Non-financial assets				
Property, plant and equipment (except for construction in progress, office buildings and land)	-	-	480,692	480,692
Total assets recurring fair value measurements	6,057	-	480,729	486,786
31 December 2014				
Financial assets				
Available-for-sale financial assets	4,055	-	77	4,132
Non-financial assets				
Property, plant and equipment (except for construction in				
progress, office buildings and land)	-	-	451,262	451,262
Total assets recurring fair value measurements	4,055	-	451,339	455,394

As at 31 December 2015 and 31 December 2014 the Group's liabilities measured at fair value are not significant.

The valuation technique, inputs used in the fair value measurement for significant Level 3 measurements and related sensitivity to reasonably possible changes in those inputs are as follows at 31 December 2015:

	Fair value	Valuation technique	Significant unobservable inputs	Reasonable change	Sensitivity of fair value measurement
Non-financial assets					
Property, plant and equipment (except for construction in	100.000	Discounted	Electricity and capacity prices	-10%	(21,696)
progress, office buildings and	480,692	cash flows	Discount rate	+1%	(14,628)
land)			Capital expenditures	+10%	(3,914)
Total recurring fair value measurements at Level 3	480,692				(40,238)

The above tables discloses sensitivity to valuation inputs for property, plant and equipment as changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would change fair value significantly.

There were no changes in valuation technique for Level 3 recurring fair value measurements during the years ended 31 December 2015 and 31 December 2014.

#### (b) Assets and liabilities not measured at fair value but for which fair value is disclosed

*Financial assets carried at amortised cost.* The Group considers that the fair value of cash, short term deposits (Level 1 of the fair value hierarchy) and accounts receivable (Level 3 of the fair value hierarchy) approximates their carrying value. The fair value of long term accounts receivable, other non-current and current assets is estimated based on future cash flows expected to be received including expected losses (Level 3 of the fair value hierarchy), the fair value of these assets approximates their carrying value.

*Liabilities carried at amortised cost.* The fair value of floating rate liabilities approximates their carrying value. The fair value of bonds is based on quoted market prices (Level 1 of the fair value hierarchy). Fair value of the fixed rate liabilities is estimated based on expected cash flows discounted at current interest rates for new instruments with similar credit risk and remaining maturity (Level 3 of the fair value hierarchy).

The fair value of current liabilities carried at amortised cost approximates their carrying value.

As at 31 December 2015 the carrying value of bonds exceeded their fair value by RR 763 million. As at 31 December 2014 the carrying value of bonds exceeded their fair value by RR 2,527 million.

As at 31 December 2015 the carrying value of non-current fixed rate debt exceeded their fair value by RR 7,121 million. As at 31 December 2014 the carrying value of non-current fixed rate debt exceeded their fair value by RR 7,319 million.

#### Note 32. Presentation of financial instruments by measurement category

The following table provides a reconciliation of classes of financial assets with the measurement categories of IAS 39, *Financial Instruments: Recognition and Measurement* as at 31 December 2015:

	Loans and receivables	Available-for-sale financial assets	Total
Assets			
Other non-current assets (Note 10)	7,896	-	7,896
Promissory notes	7,218	-	7,218
Long-term loans issued	633	-	633
Net settled derivatives	45	-	45
Available-for-sale financial assets (Note 9)	-	6,094	6,094
Trade and other receivables (Note 12)	38,383	-	38,383
Trade receivables	34,917	-	34,917
Promissory notes receivable	9	-	9
Other financial receivables	3,457	-	3,457
Other current assets (Note 14)	22,291	-	22,291
Deposits and promissory notes	19,532	-	19,532
Short-term loans issued	2,728	-	2,728
Net settled derivatives	31	-	31
Cash and cash equivalents (Note 11)	48,025	-	48,025
Total financial assets	116,595	6,094	122,689
Non-financial assets			814,660
Non-current assets and assets of disposal group classified as held for sale			788
Total assets			938,137

All of the Group's financial liabilities are carried at amortised cost. Financial liabilities are represented mainly by the current and non-current debt (Note 18), trade payables and other account payable (Note 20).

The following table provides a reconciliation of financial assets with the measurement categories as at 31 December 2014:

	Available-for-sale		
	Loans and receivables	financial assets	Total
Assets			
Other non-current assets (Note 10)	7,297	-	7,297
Promissory notes	6,158	-	6,158
Deposits	585	-	585
Long-term loans issued	373	-	373
Net settled derivatives	181	-	181
Available-for-sale financial assets (Note 9)	-	4,132	4,132
Trade and other receivables (Note 12)	35,113	-	35,113
Trade receivables	32,288	-	32,288
Promissory notes receivable	13	-	13
Other financial receivables	2,812	-	2,812
Other current assets (Note 14)	41,703	-	41,703
Deposits and promissory notes	40,122	-	40,122
Short-term loans issued	1,484	-	1,484
Net settled derivatives	97	-	97
Cash and cash equivalents (Note 11)	34,394	-	34,394
Total financial assets	118,507	4,132	122,639
Non-financial assets			760,467
Non-current assets and assets of disposal group			
classified as held for sale			664
Total assets			883,770

#### Note 33. Subsequent events

As at 28 January 2016 the Group subsidiary - PJSC RAO ES East accounted for the shares repurchased from shareholders who voted against decision on approval of large-scale deals or who did not participate in voting within the extraordinary General Shareholders meeting held at 12 November 2015. 22,282,264 ordinary nominal uncertified shares and 3,608,736 preference nominal uncertified shares were repurchased.

Shareholders accepted terms of the voluntary offer up to 18 January 2016 transferred PJSC RAO ES East shares to the account of LLC Vostok-Finance during the period from 19 January 2016 to 2 February 2016. Based on the voluntary offer LLC Vostok-Finance bought 4,707,066,939 ordinary shares and 341,828,698 preference shares of PJSC RAO ES East which amount to 11.11 percent of voting shares. PJSC RAO ES East shareholders received 2,934,258,766 shares of the Company and RR 30 million as a compensation for purchased shares.

The voluntary offer resulted to the Group share in PJSC RAO ES East capital exceeding 95 percent. According to legislation share in share capital of more than 95 percent entitles squeeze out to increase the Group share up to 100 percent, which right the Group is going to exercise.
